TCFD Disclosure

Question

Does the company integrate the TCFD framework in the management of climate-related risks and opportunities?

Rationale

This question focuses on whether a company applies the TCFD framework in the management of climate-related risks and opportunities. Demand for climate-related disclosure from investors has increased significantly since the release of the TCFD recommendations in 2017. In addition, public sector leaders have also noted the importance of transparency on climate-related issues within financial markets. Climate-related risk is increasingly the subject of new reporting requirements, such as the European Non-financial Reporting Directive 2014/95/EU, which embeds regulatory guidance based on the TCFD recommendations. Many national governments and public sector organizations formally support the TCFD and some have started to issue regulations making TCFD disclosure mandatory.

Delays in applying the TCFD framework may not only result in not meeting investors' needs but also in compliance costs.

Performance Summary	
Question Level Company Performance	100
Question Weight	5
Year-on-Year Change	100
Industry Average Score	35
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.
