Question: R&D Spending
Include Modeled Scores : Yes

R&D Spending

Question

Please provide us with your R&D spending for the last four fiscal years in the table below.

Rationale

Innovation is one of the key drivers of companies' future success and ability to generate a competitive advantage. Innovation drives product, process, and organizational change and is therefore the key differentiation factor for companies. In reality, the measurement of innovation is often based on outdated economic indicators (R&D expenditures and the number of patents), which do not capture the complexity and multidimensionality of the innovation management processes in companies. The questions have been developed to include state-of-the-art innovation indicators, covering the whole development chain from innovation input (R&D spending), and innovation management (processes in place, KPIs) to innovation output (success rates, return on investment). Additionally, the importance of environmental and social innovations is analyzed.

With this question, we assess the size and structure of companies' R&D spending (both internal and outsourced) as well as the number of employees working in R&D positions.

Performance Summary	
Question Level Company Performance	0
Question Weight	0
Year-on-Year Change	0
Industry Average Score	0
Industry Highest Score	0

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

R&D Expenses: represents the costs incurred by the following activities: development of a new product, innovation relating to technology formulation, process development, the process undertaken in upgrading the existing product or service line. R&D Expenses could also include content development expenses, media project development, software development costs, product testing, and clinical trials.

If you use other definitions for R&D expenses, please provide it in the comment box.

Data Requirements

This question is **not applicable** to bottlers in the beverages industry.

Supporting evidence: No document is required to support your response. You may still provide a reference using the reference clip. This could include examples of the underlying calculations or approaches to data aggregation used to compile the provided quantitative information.

Standards & Frameworks

GSSD - R&D spend ratio (%), Total amount of expenditures on R&D

WEF Metrics - Total R&D expenses ($)
