Question: Management Ownership
Include Modeled Scores : Yes

Management Ownership

Question

Does the company's CEO and other executive committee members hold company shares?

Rationale

As corporate governance systems aim to ensure that a company is managed in the interests of its shareholders, in this question we assess whether the company's CEO and other executive officers have stock ownership. Academic research suggests that stock ownership by senior management is positively correlated to financial performance.

Performance Summary	
Question Level Company Performance	39
Question Weight	6
Year-on-Year Change	7
Industry Average Score	37
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Shares: Shares are units of equity ownership in a corporation. In this question, we don't only accept publicly traded shares but also other forms of participation in equity ownership.

Economic interest in shares held: the shares included in the calculation should not be hedged or the personal financial risk of holding the shares otherwise removed.

Data Requirements

The question assesses the stock ownership level of the CEO and of the other member of the executive committee compared to their respective base salary.

Chief Executive Officer: Base salary and shareholdings of the Chief Executive Officer or shareholding expressed multiple of the CEO base salary.

Other Executive committee members: Base salary and shareholdings of at least two members of the executive committee or average shareholdings of the executive committee expressed as multiple of base salary. Please note that the metrics need to be reported for each named executive individually (a consolidated figure is not sufficient).

Additional credit will be granted for public reporting of the following parts of the question:

- CEO's shares as a multiple of base salary
- Average across other executive committee members owning shares as a multiple of base salary

Disclosure requirements for partially public question:

For listed companies, if no public documentation is provided, internal documentation should be provided that includes the base salary and shareholdings reported as well as the calculations.

For non-listed companies, internal documents are generally accepted.

Calculations:

CEO multiple calculation: Share price at the end of the FY * number of shares held by the CEO / base salary of CEO

Other executives' multiple calculation: (share price at the end of the FY * number of shares held by the executive 1 / base salary of executive) + (share price at the end of the FY * number of shares held by the executive 2 / base salary of executive) + (…) / number of executives with shareholdings reported

For US-based companies, please use the share price at the time of the shareholder meeting, and the salary and number of shares held at that time for the purpose of calculations.
