Question: Workforce Breakdown: Race/ Ethnicity & Nationality
Include Modeled Scores : Yes

Workforce Breakdown: Race/ Ethnicity & Nationality

Question

Does the company monitor the breakdown of its workforce according to racial and ethnic self-identifications, or nationality?

Rationale

Provisions on equality and non-discrimination are enshrined in international human rights law and in the constitutions and legislations of most countries. Nonetheless, many people continue to face prejudice, harassment, and discrimination because of their ethnic or racial origins. According to the OECD, the collection of accurate and comprehensive data on diversity is therefore central to providing information on the racial and ethnic breakdown to implementing, monitoring, and evaluating practices and policies that aim to address disadvantages and promote equal opportunities in all sectors of society.

To achieve the optimum mix of skills, backgrounds, and experience, workforce diversity needs to go beyond discussing the percentage of women to also include other diversity indicators. Collecting and analyzing data on racial and ethnic diversity is difficult but not impossible. This question seeks to encourage companies to measure the racial and ethnic composition of their workforce in order to understand whether it fairly represents the broader demographic composition of their geographical locations. Collecting and disclosing this data is key to identifying any practices of discrimination or unequal opportunities and provides an important indicator to shareholders that diversity and inclusion are considered as high on the corporate agenda. Indeed, the attention of shareholders and regulatory agencies is now expanding to include diversity factors such as ethnic and racial diversity. Companies that are early adopters

Key Definitions

Self-identification: This refers to the assigning of a particular characteristic or categorization to oneself. In this question, we ask for the proportion of employees who self-identify as such, meaning that they have expressed their identification with this characteristic rather than having been assigned it by others based on physical or other attributes.

Structurally disadvantaged racial and ethnic minorities: Minorities that experience a higher risk of poverty, social exclusion, discrimination, and violence than the general population, based on race or ethnicity. Structural disadvantage refers to disadvantages experienced as a result of the way society functions, for example how institutions are organized, who has power, how resources are distributed, how people relate to each other, etc. This question focuses on such minorities.

Race: In the absence of any internationally agreed definition, race is most often statistically characterized in terms of phenotype and appearance (e.g., skin colors), or with regard to ancestry. This should not be understood as an attempt to trace the definition of race to biological, anthropological, or genetic factors but rather to (somewhat artificially) distinguish it from the concept of ethnicity. (OECD, 2018)

Ethnicity: Describes a shared culture: the practices, values, and beliefs that characterize those belonging to a community. This multidimensional concept acts as an umbrella term encompassing language, religious traditions, and others (United Nations, 2017). A number of related concepts, including ancestry, citizenship, and nationality, may overlap with ethnicity. However, ethnicity is not the same as nationality or citizenship, nor it is a measure of biology or genes. (OECD, 2018)

Indigenous identity: While no universal definition exists in international law, the term is used to refer to "tribal peoples whose social, cultural and economic conditions distinguish them from other sections of the national community, and whose status is regulated (wholly or partially) by their own customs or traditions or by special laws or regulations; and to peoples in independent countries who are regarded as indigenous on account of their descent from the populations which inhabited the country (or a geographical region thereof) at the time of conquest, colonization or establishment of present state, and who, irrespective of their legal status, retain some or all of their own social, economic, cultural and political institutions" (ILO, 1989).

Migrant background/origin: A person who has migrated into their present country of residence; and/or previously had a different nationality from their present country of residence; and/or at least one of their parents previously entered their present country of residence as a migrant (European Commission). In some countries, migrant origins are used as a proxy for ethnicity.

Foreign origin: A person who was born outside of the country of residence; and/or holds another nationality from their present country of residence; and/or at least one of their parents were born outside of the country of residence or hold nationality from another country. In some countries, foreign origins are used as a proxy for ethnicity.

Nationality: Generally defined as being a member of a given state. Nationality can be acquired by birth or adoption, marriage, descent, or naturalization. Based on international conventions, every sovereign state is entitled to determine who can be a national of their country.

Coverage: The coverage corresponds to the scope of the data reported. For example, if a company only reports on its employees in one country, and these employees represent X% of the total workforce, then the company should select the bracket which includes this X%. If the company gave the opportunity to self-report to its employees, but a proportion of these employees have actively decided to refrain from providing this personal data, the proportion of these employees can still be included as part of the coverage.

Data Requirements

In Europe, according to **Article 9 of the GDPR**, it is prohibited to process personal data revealing racial or ethnic origin, except if the data subject has given explicit consent to the processing of those personal data, provided this is not prohibited by national law. Other exemptions exist, such as reasons of substantial public interest which might include statistical research purposes for equality of opportunity and treatment. However, if as a result, your company does not collect racial or ethnic data, please report on the nationalities which make up the highest percentage of your employees, providing the name of each nationality in each "category name" text box. "Not applicable" will **not** be accepted, as we expect companies to report on the breakdown of nationalities.

We expect companies to report on **at least three different categories** (racial or ethnic categories, or nationalities) in order to score full points for this question. The coverage provides an indication of the scope of the data reported on but is not considered in the scoring of this question as we recognize that the data is complex to consolidate at the global level.

Disclosure requirements for partially public question: Additional credit will be granted for relevant publicly available evidence covering at least one level of responsibility for at least three minority groups.

If your company has **more than 20% of its workforce in the US**, then we require you to select the first option and report according to the categories defined in the table. We expect public disclosure in at least three categories. If more than 20% of your workforce is in the US, but you also have employees in other parts of the world, please select the coverage bracket which covers your employees in the US. You will not be penalized for not reporting on the full coverage of your FTEs as we recognize that the data is complex to consolidate at the global level.

If your company has **less than 20% of its workforce in the US**, please select the second option and fill in the table according to the relevant categories for the highest share of your workforce. We expect public disclosure in at least three categories. Please select the coverage bracket which covers the scope of employees you are reporting on. You will not be penalized for not reporting on the full coverage of your FTEs as we recognize that the data is complex to consolidate at the global level.

If your company has less than 20% of its workforce in the US and you are unable or not allowed to report on ethnic and racial indicators, please select the second option and report on the nationalities which make up the highest share of your workforce. Please note that this is not the preferred option as nationality is an imperfect proxy for the diversity indicator assessed in this question. We do not accept disclosure on the geographical spread of the workforce, here we refer to the nationalities of the employees rather than their geographical location. We expect disclosure on at least three different nationalities.

Please note: If you have less than 100 employees or no employees in your organization, then **please mark the question as "Not applicable"**.

Questionnaire

Does your company provide a breakdown of its workforce according to racial and ethnic self-identifications, or nationality? Please refer to the information button for further guidance on which option to select.

Please provide the coverage reported on as a percentage of FTEs and attach supporting public evidence where indicated if available.

1. ○

   At least 20% of our workforce is based in the US and we monitor the breakdown of our workforce according to ethnic and racial indicators.

   Please select the coverage of the data reported on as a % of FTEs:

   Please select

Breakdown	Share in total workforce (as % of total workforce)	Share in all management positions, including junior, middle and senior management (as % of total management workforce)
Asian		
Black or African American		
Hispanic or Latino		
White		
Indigenous or Native		
Other, please specify:		

   1. ☐

      This information is publicly available. Please provide supporting evidence:

2. ○

   Less than 20% of our workforce is based in the US and we monitor the breakdown of our workforce according to under-represented and structurally disadvantaged ethnic and racial minorities. If you are not able or allowed to provide such a breakdown, please report on the breakdown of your workforce based on nationality. Please fill in the table below with the relevant categories used.

   1. ☐

      We report on the breakdown of our workforce based on ethnic and racial minorities. Please specify the ethnic and racial categories in the table below.

   2. ☐

      We are not able or allowed to report on ethnic and racial minorities, and therefore provide a breakdown based on nationality. Please specify the nationalities which make up the highest percentage of your workforce in the table below.

   3. ☐

      This information is publicly available. Please provide supporting evidence:

   Please select the coverage of the data reported on as a % of FTEs:

   Please select

Breakdown based on, please specify:	Share in total workforce (as % of total workforce)	Share in all management positions, including junior, middle and senior management (as % of total management workforce)
