Question: Biodiversity Exposure & Assessment
Include Modeled Scores : Yes

Biodiversity Exposure & Assessment

Question

Does the company assess the sites used for its operational activities in order to identify sites with significant biodiversity impacts?

Rationale

The purpose of this question is to assess whether companies conduct periodic assessments of sites used for operational activities (e.g., production, extraction, plantation, or development activities) to determine the exposure to critical biodiversity. Companies that are exposed to critical biodiversity are expected to implement biodiversity management plans to protect and restore habitats.

Performance Summary	
Question Level Company Performance	9
Question Weight	25
Year-on-Year Change	3
Industry Average Score	28
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Biodiversity: Is critical to the health and stability of natural capital as it provides resilience to shocks like floods and droughts, and it supports fundamental processes such as the carbon and water cycles as well as soil formation. Therefore, biodiversity is both a part of natural capital and also underpins ecosystem services.

Operational Activities: Includes any business activity which directly impacts natural capital through its operations, or indirectly by depending on critical commodities in its supply chain. Such activities may include production, extraction, plantation, construction, power generation, transmission, or development activities.

Areas: Refers to land or any other natural environment which is used, owned, leased, operated, or permitted by the company.

Biodiversity impact assessments: Defined as an evaluation exercise that involves identifying, measuring, quantifying, valuing the impacts on biodiversity of sites used for operational activities and/or areas in proximity to these sites.

Measures at the level of species or populations are directed towards the attainment of an index of the number of species and their relative abundances within a given landscape (e.g., Mean Species Abundance).

Critical biodiversity: Also referred to in the criteria as "Sites containing globally or nationally important biodiversity" and can include:

- Species classified as Critically Endangered, Endangered, or Vulnerable on the IUCN Red List, endemic species.
- Internationally recognized areas: World Heritage sites, Ramsar Wetlands, UNESCO MAB, Key Biodiversity Areas
- Nationally important biodiversity can include legally protected areas, habitats, and species.

Companies are expected to have a position or commitment to biodiversity and the impact of their operations, even if they do not currently operate in sites containing globally or nationally important biodiversity.

Proximity to critical biodiversity: Sites that either contain (i.e., overlapping) or are adjacent (between 0 and 2km from the nearest site) to critical biodiversity.

Biodiversity Management Plans: Programs addressing threatened species and habitats and are designed to protect and restore biological systems.

Data Requirements

Each column must be completed.

a) Overall

- The number of sites should include only those sites linked to operational activities such as the following: production, extraction, forestry plantations, or development.
- Company offices and premises should not be included in the count.

b) Assessment

- In this question, we are looking for assessments that are periodically conducted and can be an initial baseline or periodic re-assessment.
- The total area of sites assessed may include areas which are in close proximity to operational sites, and sites that are no longer used for operational activities. Sites that have since been sold may be excluded.
- **Data entered in row b) Assessment should not be greater than row a) Overall.**

c) Exposure

- **Data entered in row c) Exposure should not be greater than row b) Assessment.**

d) Management Plans

- Sites used for operational activities may only be partially covered by biodiversity management plans. Please only indicate the area which is covered by such a management plan.
- **Data entered in row d) Management plans should not be greater than row c) Exposure.**

For companies stating that only a minor portion of their operations faces biodiversity risks and thus do not view biodiversity as a significant risk, it is acceptable as long as the revenues generated from those operations contributes to 10% or less revenues.

Not applicable:

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

This question may be marked “Not applicable” for companies that can credibly demonstrate in a comprehensive comment that their company has:

- No impact on biodiversity in its operations
- No impact on biodiversity in the company’s key raw material supply chains.
- No production sites, as it functions as a pure Royalty company.

For ‘operations’, please provide information on a company’s biodiversity exposure and assessment on its operations, its supply chain, or a combination of both. This would ideally be aligned with the perceived biodiversity impacts of the individual business model.

If the company provides public evidence that it has conducted a risk assessment that covers the entire value chain and that it has not identified any biodiversity related risks, please answer “Not applicable” to this question.

Industry-Specific Guidance:

Utilities (ELC, GAS, MUW):

- ELC & GAS: Utilities that have no power generation or transmission business or are only in electricity/gas distribution should mark “Not applicable“ and provide an explanation in the comment box.
- MUW industry: Pure water utilities should mark “Not applicable“ and provide an explanation in the comment box.
- Areas flooded for hydropower generation can only be excluded from the count if the artificial water body has already existed for more than 10 years.
- Transmission lines or gas pipelines should not be counted as “sites“ but should be included in the “hectares“ column (please use an appropriate geometrical projection, e.g., length of line x width of line).

Real Estate (REI and REM):

Companies that have not marked ‘Development of major renovation and new construction’ as one of the main activities of the business in question ‘0.1 Denominator Area’ should mark “Not applicable”.

Companies that have marked ‘Development of major renovation and new construction’ as one of the main activities of the business in question ‘0.1 Denominator Area’ but are only operating in urban environments should mark “Not applicable” and provide an explanation in the comment box.

Consumer Discretionary (CNO, TRT):

Companies in the following industries that are only providing online services should mark “Not applicable“ and provide an explanation in the comment box.

- CNO Casinos & Gaming industry
- TRT Hotels, Resorts & Cruise Lines

Questionnaire

Has the company assessed sites used for its operational activities in order to identify sites with significant biodiversity impacts?

1. Yes, the company has assessed its operational sites to identify sites with significant biodiversity impacts

Aspects	Number of sites	Area (Hectares)	Supporting evidence	Public Reporting
a) Overall What is the total number and the total area of the company’s operational sites?				1. Yes
b) Assessment Has the company conducted biodiversity impact assessments for its own operational sites?				1. Yes
c) Exposure Of the sites assessed, how many sites have a significant biodiversity impact, or are in proximity to critical biodiversity, and what is the total area of these sites?				1. Yes
d) Management plans Of those sites that have a significant biodiversity impact, or are in proximity to critical biodiversity, how many sites have a biodiversity management plan, and what is the total area of these sites?				1. Yes

2. No, the company has not conducted any site assessments.

3.

Not applicable. Please provide explanations in the comment box below.
