Environmental Policy

Question

Does the company have a group-wide environmental policy and is it available publicly?

Rationale

A company's Environmental Management Systems (EMSs) is an important indicator of a company's preparedness and commitment to measure and reduce the environmental impact of its operations. Companies that adopt an environmental policy as a management tool are more likely to improve environmental performance in a structured and systematic way.

This question identifies the critical elements that are defined in the group-wide, public environmental policy. It also determines the scope of the policy and the highest level or endorsement.

Key Definitions

Environmental Management System (EMS): Management of an organization's environmental programs in a comprehensive, systematic, planned, and documented manner. It includes the organizational structure, planning and resources to develop them, and the procedure for the implementation and management of the company's policy on environmental management.

Environmental Policy: Group-wide, public policy that describes the intentions and directions related to environmental impacts and performance defined by top management.

Endorsement and oversight: A statement that the policy or commitment is approved, overseen, reviewed, or adopted by the board of directors or executive management. A policy can also be signed by the respective director.

Own Operations: Own employees, own business, subsidiaries, own products and services, business units, regions, sites, plants, facilities.

Suppliers: Include brokers, consultants, contractors, distributors, franchisees or licensees, home workers, independent contractors, manufacturers, primary producers, sub-contractors, tier-1 and 2 and wholesalers.

Partners: Include agents, lobbyists and other intermediaries, joint venture and consortia partners, targets of mergers and acquisitions, customers, clients.
