Packaging Materials

Question

Does the company track the amounts of packaging materials used?

Rationale

Packaging protects the products and also has an impact on consumers' decision to buy the product. However, before and after the use of the product, most packaging ends up in landfill. Therefore, reducing packaging and/or using recycled or certified material is an important factor in lowering the environmental impact of the product in its wider life cycle. This question tests whether the company's packaging strategy includes environmental considerations.

Performance Summary	
Question Level Company Performance	100
Question Weight	30
Year-on-Year Change	0
Industry Average Score	32
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Packaging: Packaging refers to all materials used to wrap, serve or protect goods. This only includes post-consumer packaging, which includes packaging waste produced during the shipping process, before having reached the company's end consumer or customer, as well as the packaging waste produced by the company's end consumer or customer after having used or consumed the product. This means that we expect companies to also include non-retail (e.g., polybags used during shipping) and operational packaging (e.g., plastic bags in stores, e-commerce packaging). Packaging which is returnable and reused several times should only be counted once in the total weight of packaging materials.

Post-consumer waste: Waste is not limited to the company's end consumer, but to any party receiving the final packaged product, and includes B2B packaging. Post-consumer waste is distinguished from pre-consumer waste, which is the reintroduction of manufacturing scrap back into the manufacturing process. Materials used in the product itself are not to be included, only materials used to ship and package the products sold or provided to consumers and/or customers.

Recycled material: Material that has been reprocessed from recovered (or reclaimed) material by means of a manufacturing process and made into a final product or a component for incorporation into a product. Recovered material is defined as material that would have otherwise been disposed of as waste or used for energy recovery, but has instead been collected and recovered (or reclaimed) as a material input, in lieu of new primary material, for a recycling or manufacturing process. This only includes post-consumer recycled material.

Recyclable packaging which is collected by the company through take-back programs and sent to be recycled or is reused for the same purpose may also be included in this percentage, as such initiatives ensure that recyclable packaging actually gets recycled.

Certified raw material: It is defined according to widely recognized schemes to provide assurance that materials are sourced in a way that limits negative externalities and meet minimum environmental and social standards. Examples include FSC, PEFC, and SFI for wood/paper fibers.

Recycled material which is also certified should not be double counted. For example, if 25% of your packaging is made out of recycled content and certified for it, then you should only enter 25%.

Coverage: Please indicate how much of your product packaging is included in the data disclosed by reporting the coverage as a percentage of cost of goods sold. For example, if you only report on your packaging for the United States, and operations in the United States represent X% of your COGS, please report X%.

Cost of goods sold: Cost of goods sold refers to the direct costs of producing the goods sold by a company. This amount includes the cost of the materials and labor directly used to create the good. It excludes indirect expenses, such as distribution costs and sales force costs. A synonym is "cost of sales". For Retailing (RTS and FDR) companies, the cost of goods sold from their own-branded products should be considered. For companies which do not sell the products but offer them on a complementary basis to their customers (AIR, CNO & TRT), please consider the coverage as a percentage of the cost of procurement.

Data Requirements

This question focuses on packaging materials which are not plastics. Plastic packaging is covered in the next question.

For packaging made from multiple materials, please report the weight of the different materials in the mixed packaging in each relevant category. If the material type is made out of recycled or certified content, then please include it in the relevant percentage.

Companies in the FDR Food & Staples Retailing Industry that are classified as drug retailers should mark this question as "Not applicable" and provide a brief explanation in the comment box.

Companies in the Casinos & Gaming industry (CNO) that are only into online gaming should mark "Not applicable" and provide an explanation in the comment box.

Companies in the Retailing (RTS) and the Food & Staples Retailing (FDR) industry should only report on their own branded products. This only applies to these two industries.

For companies which do not sell the products but offer them on a complementary basis to their customers (AIR, CNO & TRT), please consider the coverage as a percentage of the cost of procurement.

"Not applicable" may NOT be ticked for FDR, REX, FOA and BVG companies which are not legally allowed to use recycled content in their packaging. We expect them to have take-back programs in place to ensure that their packaging is recycled or reused for the same purpose.

For points to be awarded for public disclosure, the percentage of recycled/certified material needs to be publicly disclosed for at least one packaging material.

TNFD - A23

Data View

QUESTION LEVEL INPUT	COMPANY ANSWER
Company's Monitoring of Packaging Materials	Applicable
Wood/ paper fiber not used in packaging	-
Coverage for wood/ paper fiber packaging as a percentage of cost of goods sold	Not answered
Weight of wood/ paper fiber in packaging (metric tonnes)	368,334.000
Percentage of wood/paper fiber made out of recycled material	99
Target for packaging made out of recycled wood/ paper fiber for last fiscal year	99
Metal not used in packaging	YES
Coverage for metal packaging as a percentage of cost of goods sold	Not answered
Weight of metal in packaging (metric tonnes)	Not applicable
Percentage of metal packaging made out of recycled material	Not applicable

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

QUESTION LEVEL INPUT	COMPANY ANSWER
Target for percentage of recycled metal in packaging	Not applicable
Glass not used in packaging	YES
Coverage for glass packaging as a percentage of cost of goods sold	Not answered
Weight of glass in packaging (metric tonnes)	Not applicable
Percentage of glass packaging made out of recycled material	Not applicable
Target for percentage of recycled glass in packaging	Not applicable
Public reporting on packaging materials available	YES

Questionnaire

Please indicate the volumes of each different type of packaging used for the company's products.

Please note that plastic packaging is covered in the next question and is not to be considered here.

1. (•)

   Please disclose which of the following material types are used in the company's packaging for the **fiscal year 2024**. If made out of recycled and/or certified material, please detail the share (as a % of total weight) in the relevant categories and the target associated with the use of recycled and/or certified material (as a % of total weight) for the last fiscal year.

Packaging Materials	Coverage (% of cost of goods sold)	Total Weight (metric tonnes)	Recycled and/or Certified Material (% of total weight)	Target 2024 (% of total weight)
Wood/Paper fiber packaging				
1. ☐ Material not used in the company's packaging	Not answered	368334	99	99
Metal (e.g. aluminum or steel) packaging				
1. ☑ Material not used in the company's packaging	Not answered	Not applicable	Not applicable	Not applicable
Glass packaging				
1. ☑ Material not used in the company's packaging	Not answered	Not applicable	Not applicable	Not applicable

Public Reporting

1. ☑

   If publicly available, please indicate where this information can be found in the company's **public reporting** or **corporate website**.

2. ○

   No, the company does not monitor the amounts of packaging materials used.

3. ○

   Not applicable. Please provide an explanation in the comment box below.

4. ○

   Not known
