Management Ownership Requirements

Question

Does the company have specific stock ownership requirements for the CEO and other members of its executive committee?

Rationale

Corporate governance systems aim to ensure that a company is managed in the interests of its shareholders. In this question, we assess whether there are stock ownership guidelines in place for the company's CEO and other executives. Academic research (e.g., Bhagat & Bolton, 2008) suggests that stock ownership by senior management positively correlates with future operating profit.

Performance Summary	
Question Level Company Performance	0
Question Weight	6
Year-on-Year Change	0
Industry Average Score	8
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Data Requirements

This question assesses if there are explicit requirements indicating that the CEO and/or other executive managers are required to build up share ownership equivalent to a specific multiple of their annual base salary.

If the company is a REIT company managed by a third-party organization, with zero employees or a small number of employees and the company does not provide cash compensation to any of their named executive officers or other officers / no executives, this question should be marked "Not applicable".

If the company is a limited partnership entity with no employees of its own and is managed by a general partner, this question should be marked "Not applicable".

Non-listed companies: For state-owned companies, this question can be marked "Not applicable" because the company will still be assessed for having government ownership in question - "Government Ownership".

Disclosure Requirements

Listed and/or publicly owned companies are required to provide links to public reports or corporate websites.

Non-listed companies are required to provide the following evidence, depending on the type of company:

- **Family-owned companies and privately owned companies** are required to provide public reports, corporate websites, or internal documents.
- **Cooperatives** are required to provide public reports, corporate websites, or internal documents.
- **State-owned companies** are required to report on their corporate governance in the public domain as their key stakeholder is the general public.

Exceptions to the standard methodology for non-listed companies:

The definition of shares includes non-tradable stock and phantom/synthetic shares that replicate the company's share practice performance.

Phantom/synthetic shares: A phantom stock is an employee benefit plan that gives selected employees (senior management) many of the benefits of stock ownership without giving them any company stock. This is sometimes referred to as shadow stock. Phantom stock, also known as synthetic equity, has no **inherent** requirements or restrictions regarding its use, allowing the organization to use it however it chooses.

Please note: Answers in the form of 'Confidential additional comments' for any type of non-listed company will not be accepted.
