Question: KPIs for Supplier Assessment and Development
Include Modeled Score : Yes

KPIs for Supplier Assessment and Development

Question

Does the company monitor and report on the coverage and progress of its supplier screening, assessment and development programs?

Rationale

This question is for companies to disclose the results of the supplier screening process and subsequent assessment and/or development processes. It is important to monitor the coverage and progress of a supplier assessment and/or development program to ensure risks are being managed and that the company is acting responsibly by building capacity within its supply chain. This question seeks to understand if companies are capturing the number of different suppliers they have, how many are assessed, and how many out of those have been identified as having significant actual/potential negative impacts. From this, the purpose is to ascertain how many of those suppliers are supported to improve their actions and in what ways.

Performance Summary	
Question Level Company Performance	40
Question Weight	20
Year-on-Year Change	38
Industry Average Score	20
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Supplier screening: A systematic desk research of suppliers' risk for negative environmental, social and governance impacts and their business relevance, considering available data sources such as country, sector or commodity ESG risks; spending; business relevance; etc. Methodology development and screening process can be realized by the company itself or with the support of or through external specialists.

Unique significant suppliers: Suppliers that are identified as having substantial risks of negative ESG impacts or significant business relevance to the company or a combination of both. The portfolio of suppliers with sustainability priority should be the key audience of a company's supplier ESG monitoring and development program. Critical suppliers identified are also accepted as significant suppliers, even though in most cases only business relevance, and not ESG risk, is considered when identifying critical suppliers.

In this question, the company should refer to their unique significant suppliers

Desk assessments: This type of supplier assessment is realized by, or on behalf of, the purchasing company. It is generally a questionnaire where suppliers are asked to provide information and supporting evidence on their ESG policies, practices, performance and public disclosures. This information is then reviewed, verified and analyzed, resulting in an appraisal of the supplier's ESG performance, possibly with a score. This process is considered to be systematic verification because established specifications and requirements are met. Supplier desk assessments are more elaborate than supplier screenings (see Supplier Screening question) as they assess the information provided by the supplier and are usually realized in a subsequent stage of the supplier assessment process. Desk assessments do not include onsite assessments of the supplier. Purchasing companies can implement their own supplier desk assessment tools or can use tools of external providers.

For supplier desk assessments, companies can use a third-party tool/methodology/online system in their assessment to evaluate the supplier and ensure a thorough review and appraisal of the information provided and that allows them to share the assessment results with other companies who might want to procure from. This could be Responsible Business Alliance Risk-based Self-Assessment Questionnaire, EcoVadis, Together for Sustainability, Achilles, Higg Facility Environmental Module (with remote verification), etc.

2nd party supplier on-site assessments: Carried out by employees of the purchasing company or by contracted consultants. These auditors do not need to be approved or accredited by the standard-setting organization or by an accreditation body.

3rd party supplier on-site assessments: Carried out by independent third party auditing organizations that are approved/accredited by the standard-setting organization (e.g., amfori BSCI, Responsible Business Alliance, Higg Facility Environmental Module) or by an accreditation body along the requirements of ISO/IEC 17021 Conformity assessment — requirements for bodies providing audit and certification of management systems (e.g., SA8000, ISO standards).

Supplier on-site assessments are on-site supplier visits by an auditor to assess the supplier's ESG operations, policies, systems and performance. They usually involve document and record reviews; site tours; and interviews with company representatives, employees and other stakeholders. Applied methodologies can consist of their own checklists or standards and methodologies of a recognized industry or multi-stakeholder initiative. On-site assessments can also include virtual assessments or supplier employee surveys.

Supplier assessments (desk or onsite) are carried out using standards and methodologies of a recognized industry or multi-stakeholder initiative: Desk or on-site assessments that are carried out following standards and methodologies of a recognized industry or multi-stakeholder initiatives such as SMETA, Responsible Business Alliance, amfori BSCI, Responsible Minerals Initiative, SAI Platform or others.

Substantial actual/potential negative impacts: In the GRI Standards, unless otherwise stated, "impact" refers to the effect an organization has on the economy, the environment and/or society, which in turn can indicate its contribution (positive or negative) to sustainable development. Negative impacts include those that are either caused or contributed to by an organization, or that are directly linked to its activities, products or services by its relationship with a supplier. Actual impacts are those that have happened. Potential impacts are those that may occur where actions can be taken by the company to prevent, mitigate or remediate the impacts. Substantial can be defined as a critical or major noncompliance with minimum requirements leading to severe damage to the environment or people's physical or psychological integrity or to the systematic failure of the supplier to protect people or the environment from harm.

Supplier corrective action plan: A corrective action plan (CAP) is an important quality management tool for any business or supplier. A CAP is a method of documenting noncompliance issues; identifying their root causes; and capturing measurable, achievable solutions and realistic deadlines. This refers to suppliers that are in the process of implementing their CAP.

Supplier support (remote/onsite) on implementation of corrective action plans: The company provides guidance and support on the implementation of corrective and improvement actions. This can happen remotely or by visiting the supplier.

Capacity building programs: Comprehensive capacity building programs to systematically improve supplier practices and performance on specific ESG topics (e.g., energy efficiency, chemical management, health & safety management, working hours reduction) through training, baseline assessments, collaborative system development and progress measurement. Capacity-building is defined as the process of developing and strengthening the knowledge, skills, instincts, abilities, processes, and resources that organizations need to survive, adapt, and thrive in a fast-changing world. Such programs go beyond corrective action support and usually take six or more months to implement. These capacity-building programs are long-term and sustained over time with the aim of improving ESG performance rather than solely implementing action plans.

Data Requirements

- Quantitative figures provided in the response do not need supporting evidence. The company may still provide a reference using the reference clip. This could include examples of the underlying calculations or approaches to data aggregation used to compile the provided quantitative information.
- The supporting documents do not need to be available in the public domain. However the company will not receive points for public reporting.
- We expect the data provided to be related to the number of unique significant suppliers as shown in the question statement.
- This means that the entirety of this question pertains to the 'total number of significant suppliers (Tier-1 and non Tier-1) identified in aspect 1.5 of 'KPIs for Supplier Screening' question
- Therefore, aspect 1.1, 2.1 and 3.1 of **this** question all must be less than or equal to aspect 1.5 of the 'KPIs for Supplier Screening'
- We expect "2.1 Total number of suppliers supported in corrective action plan implementation" to maximally equal "1.3 Number of suppliers assessed with substantial actual/potential negative impacts". Essentially, the number provided in 2.1 cannot exceed the number in 1.3.

Public reporting

To accept public reporting for KPIs for assessment and development, the company needs to publicly disclose data on at least one of the following metrics:

- Supplier assessment "Total number of unique suppliers assessed"
- Supplier corrective action support "Total number of suppliers supported in corrective action plan implementation"
- Supplier capacity building programs "Total number of suppliers in capacity building programs"
- If the company reports data but it is not available in the public domain, no points for public reporting will be awarded.

Third Party Verification

Third party verification is accepted if at least one of the metrics required for public reporting is verified by a third party. Data must be verified for the most recent financial year by an appropriate verification or auditing firm. Government verification is not considered relevant.

Not applicable – General rule

"Not applicable" for this question (beyond the industries detailed below) will only be accepted for special cases. In such cases, the company must credibly explain via a comprehensive company comment and/or public reporting that it does not purchase goods or services for the purposes below. To be granted "Not applicable" the company must state that it:

- Does not use goods or services in its production processes.
- Does not re-sell goods or services to its customers.
- Does not utilize goods or services as capital goods (e.g., machines/infrastructure) in its operations.

Industry-specific special cases:

REI – Equity Real Estate Investment Trust (REIT): Companies that have only marked "Management of Standing Investments" as the main activity of the business in question "0.1 Denominator Area" should answer "Not applicable" to this question.

REM – Real Estate Management & Development: Companies that have only marked "Services" as the main activity of the business in question "0.1 Denominator Area", should answer "Not applicable" to this question.

OIE - Energy Equipment & Services Industry: Services companies (consultancy or seismic surveying) should answer "Not applicable" to this question.

Questionnaire

Does the company monitor and report on the coverage and progress of its supplier assessment and/or development program?

Please report the number of unique suppliers, **which were identified as significant in the supplier screening process**. These are **unique significant suppliers assessed during the reporting period** (not number of assessments realized, i.e. no multiple count of suppliers if they were assessed more than once during the reporting period).

1. (●)

   Yes, the company monitors and reports on the coverage and progress of its supplier assessment and/or development program. It includes the following:

   1. [☑] Coverage and progress of the company's supplier assessment program

Supplier Assessment	FY 2024		Target for FY 2024	
1.1 Total number of suppliers assessed via desk assessments/on-site assessments	6	% of significant suppliers	96	

1.2 % of unique significant suppliers assessed: 2.926829

1.3 Number of suppliers assessed with substantial actual/potential negative impacts: 0

1.4 % of suppliers with substantial actual/potential negative impacts with agreed corrective action/improvement plan: 0

1.5 Number of suppliers with substantial actual/potential negative impacts that were terminated: 0

2. ☐

Coverage and progress of suppliers with corrective action plans

Corrective action plan support	FY 2024	Target for FY 2024	
2.1 Total number of suppliers supported in corrective action plan implementation	Not answered	Please select	Not answered
2.2. % of suppliers assessed with substantial actual/potential negative impacts supported in corrective action plan implementation	0.000000		

3. ☐

Coverage and progress of suppliers in capacity building programs

Capacity building programs	FY 2024	Target for FY 2024	
3.1 Total number of suppliers in capacity building programs	Not answered	Please select	Not answered
3.2 % of unique significant suppliers in capacity building programs	Not answered		

PUBLIC REPORTING

1. ☐

The company's data is publicly available. Please provide supporting evidence or web link.

THIRD-PARTY VERIFICATION

1. ☐

The company's data has been third-party verified in the most recent financial year reported. Please provide supporting evidence.

2. ○

No, the company does not monitor and report on coverage and progress of its supplier assessment and/or development program.

3. ○

Not applicable. Please provide explanations in the comment box below.

4. ○

Not known
