Customer Satisfaction Measurement

Question

Does the company monitor and set quantitative targets to improve satisfaction and are targets and results communicated externally?

Rationale

Research from Harvard Business School has shown that a 5% increase in customer retention can result in a bottom-line profit increase of up to 75%, depending on the industry. The economic power of retention is demonstrated by lifetime value. The value of retention makes business sense when considering that a consumer retained for life is more cost-effective, requires less service, provides more business, and contributes to new customer acquisition by offering positive referrals. Companies in business-to-consumer (B2C) industries should therefore monitor customer satisfaction and report the results of satisfaction surveys that target the consumers (i.e., end users) of their products/services.

Performance Summary	
Question Level Company Performance	100
Question Weight	54
Year-on-Year Change	10
Industry Average Score	38
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Customer or client: Buyer of goods or services. In the context of this questionnaire, we focus on customers/clients for business-to-business (B2B) companies.

Consumer: User of a product or commodity. In economics, a consumer can either be a single person or an entire organization that uses a service. In the context of this questionnaire, we focus on consumers for B2C companies.

Data Requirements

- B2C companies should report the results of satisfaction surveys targeting consumers of their products/services (i.e., end users of the products/services instead of the distributor/retailers they sell their products through).
- B2B companies should report the results of satisfaction surveys for their customers or clients (direct buyers of their products or services)

In case your company is active in different businesses involving B2C activities (consumers) and B2B (customers), please report the information corresponding to the business that represents the highest share of your total revenue.

Unit: Percentage of satisfied customers out of the total number of customers responding to the survey.

The percentage should be calculated as follows:

Number of satisfied customers / total number of customers responding to the survey

Data Coverage: Percentage of respondent and non-respondent customers surveyed out of total customers.

The data coverage should be calculated as follows:

Number of customers surveyed (respondents and non-respondents) / total number of customers

Companies may report full coverage if a statistically significant, representative sample of its customer base has been surveyed.

Target: We require the absolute target for the most recent reporting year. If your company has a multiyear and/or relative target, please extrapolate what the target value would have to be for the last financial year to make sure you are progressing well towards achieving the target by the end of the target period.

Biennial satisfaction surveys: If your company only conducts a customer satisfaction survey every two years, please copy the results from the previous year (when you conducted a survey) into the box for the following year (when you not conduct one). For example, if you conducted a survey in 2015, but not in 2016, copy the results from the 2015 survey in the 2016 box, to fill the entire table and make it possible to calculate a trend (FY-2 to FY0).

Guidance for Utilities (ELC, MUW, GAS)

In case a company only has exposure to electricity transmission and/or distribution, we expect to use this question to gather information about the satisfaction of the clients using the services provided by the company regardless of the income model. For instance, we intend to capture information about the satisfaction of generators, consumers and/or distributors requesting connection access to the infrastructure, generators, and consumers participating in markets operated by the company, or participants in the network planning process if it is coordinated by the infrastructure operator, etc.

Guidance for Real Estate Management & Development and Equity REIT

In the "Denominator – Area" question, if the business activity "Management of Standing Investments" is chosen, we expect companies to choose "tenants" in the dropdown list for data coverage. If this activity is not chosen, i.e., only the activities "Development of new construction and/or major renovation projects" and/or "Services" are selected, we expect companies to report on "customers".

Investment holding companies: For companies that handle a broad portfolio of investments in various industries, this question will be **"Not applicable."**

CON & B2B sectors: If the business model is such that there are limited numbers of clients (less than 15) and therefore account managers are appointed for managing individual clients then this question should be marked as "Not applicable". For example, an upstream oil and gas company with a small number of industry customers. It maintains 1 to 1 client relationships; therefore, measures of customer satisfaction do not apply to them.

Disclosure Requirements

Disclosure requirements for partially public question. Additional credit will be granted for relevant publicly available evidence covering the following aspect of this question:

- Percentage of satisfied clients in the last reported year (measured through a satisfaction survey or through an alternative approach)

Standards & Frameworks

CSRD - BP-2 Phase-In Provisions, S4-5 Targets, SBM-2 Stakeholder Engagement

Satisfaction value calculated as per the methodology (2022)	Not answered
Satisfaction value calculated as per the methodology (2023)	89
Satisfaction value calculated as per the methodology (2024)	85
Target percentage of satisfied clients set for last fiscal year	75
Coverage of customer satisfaction measurement (2021)	75
Coverage of customer satisfaction measurement (2022)	Not answered
Coverage of customer satisfaction measurement (2023)	80
Coverage of customer satisfaction measurement (2024)	33
This aspect refers to the unit of satisfaction data used in measuring customer satisfaction.	Percentage of satisfied customers/tenants
Information on % of customers, operations, revenues and tenants covered to measure customer satisfaction	Customers
Customer satisfaction data reported in the questionnaire differs from publicly available data	-

Questionnaire

Does the company monitor and set quantitative targets to improve satisfaction and are targets and results communicated externally? Please attach documents and indicate the coverage for the data provided. Please refer to the information button for additional clarifications. For each row in the table, it is mandatory that the values provided are in the same unit.

1. (●)

Yes, the company measures customer satisfaction using a relevant unit of measurement.

Satisfaction measurement	Unit (please select the unit of measurement)	FY 2021	FY 2022	FY 2023	FY 2024	What was the target for FY 2024?
Satisfaction measurement	Satisfaction measurement methodology: Percentage of satisfied customers/tenants	70	Not answered	89	85	75
Data coverage:	percentage of: Customers	75	Not answered	80	83	

PUBLIC REPORTING

1. ☑

The company's data is publicly available. Please provide supporting evidence or web link.

DATA CONSISTENCY

1. ☐

The company reports publicly on this information, but the data in the table above differs from its publicly reported figures. Please provide an explanation in the comment box for this difference:

2. ○

No, the company does not measure customer satisfaction.

3. ○

Not applicable. Please provide explanations in the comment box below.
