Hiring

Question

Does the company track the total number of new employee hire rates and the percentage of open positions filled by internal candidates?

Rationale

Employees are one of the most important intangible assets for companies. The ability to attract qualified and talented employees, as well as to retain and nurture internal talent, is crucial for corporations to succeed. Companies focused on attracting the best talent should not forget about internal talents who have grown with the company and understand the organization, its mission and culture. Companies need to build organized internal career mobility processes to retain talent and reduce external hiring costs. This question asks for the number of new employee hires, the percentage of positions filled by internal candidates, hiring costs, and data breakdown by age, gender, race/ethnicity and management level.

Performance Summary	
Question Level Company Performance	50
Question Weight	10
Year-on-Year Change	(5)
Industry Average Score	36
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Full-time equivalents (FTEs): Full-time equivalents refers to the number of working hours that represents one full-time employee during a fixed time period, such as one month or one year. The concept is used to convert the hours worked by several part-time employees into the hours worked by full-time employees.

Total number of new employee hires: This refers to the number of new FTEs hired in the reporting year. It should not include internal candidates, i.e., existing employees that have been hired in different positions or internally promoted.

Percentage of open positions filled by internal candidates (or internal hires or promotions): This refers to the total number of open positions filled by a company's own employees divided by the total number of vacancies in the company in the reporting year. This metric provides a way to determine the effectiveness of human capital development by providing employees with the skills required for promotion, and also demonstrates how proactive organizations are in providing their employees with new challenges for growth and development throughout their careers.

Average hiring cost per FTE: This refers to the average cost of hiring a new FTE in the reporting year. This figure should be calculated based on the costs of hiring all new FTEs in the reporting period and not based on the cost of hiring FTEs who were already at the company before the last fiscal year started. The average hiring cost includes internal and external recruiting costs, e.g., recruiter salaries, interviews, agency fees, advertising, job fairs, travel, and relocation costs.

Data Requirements

IMPORTANT if you are prefilling data from previous assessments: Please note that for technical reasons, the data from fiscal 2019 is being prefilled in all four years for the "Percentage of open positions filled by internal candidates" and the "Average hiring cost/FTE" fields. Please make sure to review the prefilled data and update it accordingly for each fiscal year. Duplicated data that is not supported by an explanation in the comment box will be removed.

Data Breakdown

- We do not expect companies to break down the data by all the categories mentioned in the question, but full points will be granted for having a breakdown for at least two categories in this section. The purpose of this section is to assess whether companies can track these metrics to evaluate and reassure fair treatment of all employees.
- In Europe, according to **Article 9 of the GDPR**, it is prohibited to process personal data revealing racial or ethnic origin, except if the data subject has given explicit consent to the processing this data, provided it is not prohibited by national law. Other exemptions exist, such as reasons of substantial public interest which might include statistical research for equality of opportunity and treatment. We therefore expect companies to report on **only two different categories**, to not penalize companies that do not report data breakdown on race.
- For this section, companies can attach either private or public evidence and we expect to see the specific quantitative data broken down by these categories
- Options should only be ticked if the information on either of the KPIs in the table (either total number of new employee hires or percentage of open positions filled by internal candidates) is available.

Please note: If you have 25 or less FTEs in the organization, then **please mark the question as "Not applicable"**.

Disclosure Requirements

Additional credit will be granted for relevant publicly available evidence covering the following aspect of this question, for at least the most recent reported year.

- Total number of new employee hires
- Percentage of open positions filled by internal candidates (internal hires)

Average hiring cost per FTE in the last fiscal year (2021)	Not answered
Average hiring cost per FTE in the last fiscal year (2022)	Not answered
Average hiring cost per FTE in the last fiscal year (2023)	Not answered
Average hiring cost per FTE in the last fiscal year (2024)	Not answered
Employee hires data breakdown by age	YES
Employee hires data breakdown by gender	YES
Employee hires data breakdown by management level	-
Employee hires data breakdown by race, ethnicity, nationality, country of origin or cultural background	YES

Questionnaire

Please indicate the total number of new employee hire rates and the percentage of open positions filled by internal candidates. Please also report the average hiring cost/FTE for the last fiscal year.

Please note: The average hiring cost/FTE should specifically relate to the number of employees hired last year, not average cost for all employees.
