Include Modeled Scores : Yes

Certifications of Animal Products

Question

Does the company track its exposure to animal products including the amount used and whether they received certification from one or more independent third parties in the last financial year?

Rationale

In the past decade, the importance place on animal welfare in commercial livestock operations has increased. Governments, academic institutions, and animal welfare professionals are addressing the issue across the agricultural supply chain, while consumers demand higher standards for food safety and animal welfare. Businesses that address or improve animal welfare are likely to win or retain a competitive advantage in the global marketplace by:

- reducing costs due to reduced animal stress and other welfare benefits, which can lead to increased productivity;
- realizing growing market opportunities for food produced in animal welfare-credential systems; and/or
- becoming the producer of choice for retailers and consumers concerned with animal health and welfare, food safety and quality, human health, and the environment.

With this question, we seek to ascertain animal welfare strategy and performance by assessing the percentage of production or supplies certified to animal welfare standards.

Performance Summary	
Question Level Company Performance	0
Question Weight	20
Year-on-Year Change	(44)
Industry Average Score	26
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Animal products: A material that is derived from the body of an animal (e.g., fat, flesh, milk, egg, etc.). including 'by-products' which may not be consumed by people and are instead used for rendering to human and non-human foodstuffs, fats, and other materials that can be sold to make commercial products such as cosmetics, paint, cleaners. Animal products may also feature in feed used for animal production, such as fishmeal, feather meal, etc.

Aquaculture products: Farming of fish, crustaceans, mollusks, aquatic plants, algae, etc. in either fresh- or saltwater environments. Aquaculture also includes mariculture, which specifically refers to farming in offshore environments. Typical aquaculture includes Salmon, Shrimp, Oysters, Seaweed, Tilapia, etc.

Cattle (excl. Dairy): Also referred to as cows/heifer (female) or bulls/steer (male) are livestock commonly raised for meat (beef or veal), dairy, or hides.

Dairy: A product that contains or is made of milk such as yogurt, cheese, and butter. The milk used for dairy products may come from cattle, buffaloes, goats, sheep, or camels.

Swine: Also referred to as pigs, are raised predominantly for meat production (pork). Products next to fresh meat include ham, smoked pork, gammon, bacon, and sausage.

Poultry: Domesticated birds which are kept for meat, egg, or feather production. Types of birds include chickens, ducks, geese, turkeys, quails, guinea fowl, pigeon, etc.

Wild fisheries products: Also referred to as wild capture, are associated with capturing or fishing wild fish or aquatic living organisms for various purposes. Wild fisheries occur in both fresh- and saltwater environments. The most common types include pelagic marine fish (tuna, mackerel, herring, sardines, etc.) and demersal marine fish (e.g., flatfish) but also include mollusks, crustaceans, and other aquatic life.

Critical animal products: The animal products in this question have been selected based on their sensitivity to social and environmental risks which include - but are not limited to - climate change, biodegradation, deforestation, health and safety, human, labor & community rights.

Amount (metric tonnes): Refers to the amount of animal products the company is exposed to. The amount is reported in metric tonnes.

Certification: In this question this refers to the certificate that was issued by an independent organization based on the company's compliance with pre-defined social and environmental standards related to the sustainable production of a particular agricultural commodity.

Type of certification: Whether the certification is considered as a leading type or other. See the data requirements section for more information.

Percentage of certified animal products: The weight of a given animal product that is certified as a percentage (%) of the total weight of said animal product.

Data Requirements

Please answer each row

The scope of this question regarding exposure to animal products includes:

- Production of animal products
- Production of ingredients derived from animal products
- Production of products containing animal products
- Production of products containing ingredients derived from animal products

Coverage:

- If you have selected 'Yes, the company is exposed to animal products [...]' and you are providing information on certification in column C (Certification), please ensure to also provide data in column B (metric tonnes) and E (% of certified products).

Exposure:

- If your company is not exposed to a given animal product, please select 'Not applicable'.

Leading Third-Party Certification List:

- **Aquaculture products:** Aquaculture Stewardship Council (ASC)
- **Cattle products (excl. dairy):** Global Animal Partnership (G.A.P.)
- **Dairy products:** Global Animal Partnership (G.A.P.)
- **Swine products:** Global Animal Partnership (G.A.P.)
- **Poultry products:** Global Animal Partnership (G.A.P.)
- **Wild fisheries products:** Marine Stewardship Council (MSC), MSC Chain of Custody

Other Recognized Certification and Standards List:

- **Aquaculture products:** Friends of the Sea (FOS), Non GMO, Safe Quality Food, Carrefour Corporate Program, SalmonChile (SIGES), Scottish Salmon Producers' Organization Code of Good Practice, Bio Suisse, BioGro New Zealand, Soil Association, China GAP, ASC Chain of Custody, Best Aquaculture Practices (BAP), GlobalG.A.P.
- **Cattle products (excl. dairy):** Certified Humane, Animal Welfare Approved, European Union Cattle Accreditation Scheme (EUCAS), RSPCA Assured, North American Meat Institute, National Cattlemen's Beef Association, AAWCS (Australia), Red Tractor (UK)
- **Dairy products:** Certified Humane, Animal Welfare Approved, RSPCA Assured, AAWCS (Australia), Fairtrade, Red Tractor (UK)
- **Swine products:** Certified Humane, Animal Welfare Approved, National Pork Board, APIQ (Australia), AAWCS (Australia)
- **Poultry products:** Certified Humane, Animal Welfare Approved, Freedom food, RSPCA Assured, National Chicken Council, National Turkey Federation, United Egg Producers, AAWCS (Australia), European Chicken Commitment standards, Label Rouge, Red Tractor (UK)
- **Wild fisheries products:** Natural Wildfish, Antibiotic Free (ATBF), Naturland Association, Dolphin-safe/dolphin-friendly labelled tuna, Marine Eco-Label (Japan), KRAV, UK Seafish Responsible Fisheries Scheme, MSC Chain of Custody

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

If the company is not exposed to animal products (i.e., does not procure, produce or sell animal products), please answer "The question is not applicable to the company". If this is the case, please ensure that the questions 'Animal Welfare Disclosure' and 'Animal Welfare Policy' have also been answered as "This question is not applicable to the company".

Industry-specific guidance

Companies in the Food & Drug Retailing Industry that only do drug retailing should mark this question as "This question is not applicable to the company" and provide an explanation in the comment box.

Disclosure Requirements

Supporting documents: The information disclosed in this question needs to be supported by either private or public documents for the following two aspects of each applicable animal product. Please note that additional credit will be awarded for publicly available information:

- Certification
- Percentage of certified animal products
