Question: Exposure of Suppliers to Water Risks
Include Modeled Scores : Yes

Exposure of Suppliers to Water Risks

Question

Does the company systematically track and map the exposure of its suppliers to water-related risks with a comprehensive water tool taking into account local physical water risks?

Rationale

Understanding water-related risks is not only important for companies' own operations, but also for those of their suppliers. With this question, we assess if companies have analyzed what proportion of their commodities are sourced from water stressed areas. This assessment can help companies better understand the resilience of their supply chains and to better mitigate these risks.

Performance Summary	
Question Level Company Performance	80
Question Weight	12
Year-on-Year Change	(20)
Industry Average Score	30
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Water stress: When withdrawals are greater than 20% of total renewable resources, water stress often is a limiting factor on development; withdrawals of 40% or more represents high stress. Similarly, water stress may be a problem if a country or region has less than 1,700 m3 yr-1 of water per capita (Falkenmark and Lindh, 1976)." Source: IPCC Report 2001

Other acceptable definitions of water-stressed areas include:

- "High water-stressed areas", as defined by the WBCSD Global Water Tool
- "High Risk" or "Extremely High Risk" areas, as mapped by WRI's Aqueduct Global Water Tool
- "High Risk" or "Extremely High Risk" areas, as mapped by Water Footprint Network
- Environmental Flow smaller than 40%, as mapped by UN FAO https://www.unwater.org/sites/default/files/app/uploads/2019/01/SDG6_EF_LOW2.pdf

Agricultural commodities: refers to sourced crops or agriculturally-based inputs that are integrated in the company's core business.

Non-exhaustive list of agricultural commodities: wheat, cotton, flax, corn, dry beans, oats, barley, rye, tobacco, rice, peanuts, soybeans, sugar beets, sugar cane, tomatoes, grain sorghum, sunflowers, raisins, oranges, sweet corn, dry peas, freezing and canning peas, forage, apples, grapes, potatoes, industrial hemp, timber and forests, nursery crops, citrus, and other fruits and vegetables, nuts, tame hay, native grass, aquacultural species including, but not limited to, any species of finfish, mollusk, crustacean, or other aquatic invertebrate, amphibian, reptile, or aquatic plants.

Data Requirements

Please indicate what percentage of the company's agricultural commodities originate from water-stressed areas and what percentage of cost of goods purchased or acquired (COGA) these amounted to in the last fiscal year. If COGA is not a relevant metric for the company, please leave that information blank.

Please note that to be able to evaluate the other questions in this criterion, we expect clear evidence of the mapping showing that the company is taking water stress into account for its supply chain.

- The criterion should be marked "The question is not applicable to the company" for companies in the MUW industry that generate at least 40% of their revenues from the water business.
- Criterion should be marked "The question is not applicable to the company" for water companies since this whole criteria looks at water as a production input, whereas for water distribution companies, water is also the final good delivered.
- Criterion should be marked "The question is not applicable to the company" for companies that are only into transmission/distribution business as they do not require water as an input to run their operations.
- Criterion should be marked "The question is not applicable to the company" for companies that are producing 100% solar and/or wind energy.

Disclosure Requirements

Supporting evidence:

- The document(s) you attached will be used to verify your response.
- The supporting documents do not need to be available in the public domain.
- If a question text field is available, a comprehensive answer in that field can be accepted instead of a supporting document.
- Any response that cannot be verified in the attached document(s) or via the information provided in the related question text field (if available) will not be accepted.

Disclosure requirements for partially public question:

Additional credit will be granted for relevant publicly available evidence.

QUESTION LEVEL INPUT	COMPANY ANSWER

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

QUESTION LEVEL INPUT	COMPANY ANSWER
Exposure of company's suppliers to water risks	Applicable
Description of supply chain exposure to water-related risks	Wheat
Evidence for supplier assessment meets S&P requirements	YES
Dropdown exposure based on CDP on Cattle products	Not answered
Dropdown exposure based on CDP on Maize	100%
Dropdown exposure based on CDP on Palm Oil	1-10%
Dropdown exposure based on CDP on Rice	Not answered
Dropdown exposure based on CDP on Soy	Less than 1%
Dropdown exposure based on CDP on Sugar	1-10%
Dropdown exposure based on CDP on Tobacco	Not answered
Dropdown exposure based on CDP on Cotton	Not answered
Dropdown exposure based on CDP on Other	100%
Company publicly reports on its supply chain water risks exposure	-

Questionnaire

Does the company systematically track and map the exposure of its suppliers to water-related risks with a comprehensive water tool taking into account local physical water risks?

1. (●) Yes, the company systematically tracks and maps the exposure of its suppliers to water-related risks. Please indicate where this information is available.

Agricultural commodity	Percentage of sourced agricultural commodities originating from water-stressed areas (e.g. <1700 m3/(person*year) or high, very high and severe) (mandatory)
Cattle products	Please select
Maize	100%
Palm oil	1-10%
Rice	Please select
Soy	Less than 1%
Sugar	1-10%
Tobacco	Please select
Cotton	Please select
Other, please specify: Wheat	100%

Percentage of cost of goods purchased in the last financial year (if applicable)

   1. [x] The supplier assessment meets S&P Requirements.
   2. [ ] The data is publicly available.

2. ( ) No, the company does not systematically track and map the exposure of its suppliers to water-related risks.
3. ( ) The question is not applicable to the company.
4. ( ) The information is not available.

Confidential additional comments

Use the text field below only in the following cases: (i) to describe significant changes in data or calculation methodology compared to last year's submission, (ii) to explain why a question is not applicable to your company's business model, (iii) to explain if your data

deviates from the unit or format requested, or (iv) to provide supporting notes on translations of non-English references.
