Board Gender Diversity

Question

Does the company report the number of women on its board of directors/supervisory board?

Rationale

We assess whether the board reflects the diversity of the workforce and marketplace, thereby ensuring that a variety of viewpoints are heard and factored into corporate decision-making. A commitment to diversity at all levels can help companies attract employees, create goodwill with consumers and better compete in diverse markets globally, which in turn benefits long-term shareholder value. Gender diversity has been an important topic of discussion in recent years, and various academic studies have shown a correlation between gender diversity and corporate performance, for example, in corporate governance (Adams and Ferreira, 2009) or company innovation (Dezsö and Ross, 2012).

Performance Summary	
Question Level Company Performance	59
Question Weight	12
Year-on-Year Change	0
Industry Average Score	48
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Data Requirements

Provide information on board members that are currently (at the time the assessment is performed) in the board. This means that if the board member has resigned from the board (for example in March 2020) and the assessment in performed in May 2020, do not include them as part of the board.

Include board member who has announced her/his resignation but has not yet resigned (at the time the assessment is performed) as part of the board. She/he should not be included if she/he has already resigned at the time the assessment is performed.

A board nominee should not be included as a board member unless she/he has already been elected at the time of the assessment. (A nominee should only be included if she/he sits for re-election, not if she/he's a nominee for a first mandate).

For one-tier boards: Employee representatives should not be included in the total number of women on the board for one-tier boards. If there are no women on the board of directors or supervisory board, please write 0 when answering this question.

For two-tier boards: Employee representatives and senior executives should not be included in the total number of women for two-tier boards as they are not considered in the calculation of the total size of the supervisory board.

For this question, we are looking for the number of women on your company's board of directors/supervisory board.

- If your company has a one-tier board structure, this figure includes female executive directors, non-executive directors, and independent directors.
- If your company has a two-tier board structure, this figure ONLY includes female independent directors and non-executive directors (meaning senior executives and employee representatives should not be included). Hence, the management board should not be considered in this question.

Disclosure Requirements

Listed and/or publicly owned companies are required to provide links to public reports or corporate websites.

Non-listed companies are required to provide the following evidence, depending on the type of company:

- **Family-owned companies and privately owned companies** are required to provide public reports, corporate websites, or internal documents.
- **Cooperatives** are required to provide public reports, corporate websites, or internal documents.
- **State-owned companies** are required to report on their corporate governance in the public domain as their key stakeholder is the general public.

Please note: Answers in the form of 'Confidential additional comments' for any type of non-listed company will not be accepted.

References

The study "**Corporate Governance, Board Diversity, and Firm Value**" (October 2001) examined Fortune 1000 firms and found a significantly positive relationship between the fraction of women or minorities on the board and firm value.
