Materiality Analysis

Question

Does the company disclose details of its materiality determination process and how the materiality analysis is conducted?

Rationale

This question will assess the extent to which companies are disclosing the details related to their materiality processes. We are looking for the following evidence in the public domain:

1. Frequency of conducting or reviewing materiality analysis

2. Involvement of external stakeholders in identifying material issues

3. Prioritization of material issues in a materiality matrix or any other form

4. Integration of materiality assessment in the company's enterprise risk management

5. Assessment conducted is based on the principle of double materiality, i.e., considers internal impact on the business and external impact on society and the environment

6. Materiality assessment process is verified by a third-party assurance provider

7. Materiality assessment results are signed off by either the board of directors or senior management

Performance Summary	
Question Level Company Performance	80
Question Weight	20
Year-on-Year Change	30
Industry Average Score	36

Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Materiality: Any factor that has or can have an impact on value creation and the company's financial performance. These could be economic, environmental or social in nature.

Internal impact: The impact on a company's business operations, cash flows, legal or regulatory liabilities, and access to capital. It can also be perceived as an improvement or maintenance of a company's reputation and relationships with key stakeholders, society and the environment.

External impact: The direct and indirect damage or benefits to societal stakeholders and the environment by a company's business activities, business model, products and services in the short and long term.

Materiality assessment: A materiality assessment is an approach that identifies critical economic, environmental and social issues that have a significant impact on a company's business performance.

Materiality assessment frequency: We expect companies to conduct or review materiality assessments and to report the results in at least one of the two most recent annual or sustainability reports.

Data Requirements

Copy of, or link to, the company's website, annual report, sustainability report or other public communication.

1. Materiality analysis conducted/reviewed:

Our expectations

- Public disclosure on the frequency of materiality analysis conducted or reviewed. The information should be available in at least one of the two most recent annual or sustainability reports.

Not acceptable:

- References to public materiality analysis reports that are more than 2 years old.

2. Involvement of external stakeholders:

Our expectations:

- if external stakeholders are involved in the materiality analysis process, it should be clearly stated in the company's public documents/website.
- Information should be available in the section where materiality analysis was discussed.

Not acceptable:

- Only stating that stakeholders are involved without any reference to the type, i.e., external or internal stakeholders
- General stakeholder engagement information without any reference to how it is integrated with the materiality assessment process.

3. Prioritization of material issues:

Our expectations:

- Material issues should be publicly disclosed and prioritized either in a matrix format or any other priority listed format

Not acceptable:

- Only stating that a materiality determination/prioritization process was conducted without disclosing the top material issues.

4. Integration of materiality assessment results in enterprise risk management (ERM):

Our expectations:

- Public disclosure on the integration of materiality assessment results within the overall risk management process.
- Description of how identified material issues are linked with the company's significant risks.

Not acceptable:

- General disclosure on environmental, social and governance related risks without specifying their linkage to materiality assessment results.
- ERM results used as inputs to materiality process

5. Assessment conducted is based on the principle of double materiality, i.e., considers internal impact on the business as well as external impact on society and the environment

Our expectations:

- Indication of considering external and internal impacts on the materiality assessment in company public reports/website
- A materiality matrix depicting both: the impact of the company's business activity on society, the environment, and people and the internal impact on the business.

Not acceptable:

- General disclosure on impact valuation analysis without reference to its link with identified material issues

6. Materiality assessment process verified by third-party assurance provider:

Our expectations:

- Public disclosure on assurance report that clearly specifies the audit of materiality assessment covered in its scope
- A statement specifying external assurance of the materiality assessment process

Not acceptable:

- Disclosure of the involvement of an external consultant in the materiality assessment process
- Assurance statement without a clear indication of materiality assessment under its scope

7. Materiality assessment metrics signed off by the Board of directors or Senior Management:

Our expectations:

Review, sign-off, approval, and oversight of materiality assessment process by:

- the board of directors, a sub-committee of the board of directors, or a single named director
- an executive manager/executive committee
- The materiality assessment results are signed by the respective board/executive representative(s)/
- A general statement specifying sign-off/approval of a materiality assessment result is also sufficient

Not acceptable:

- Executive manager/sustainability manager involvement in the materiality assessment process

Disclosure Requirements

- The document(s) you attach will be used to verify your response.
- The supporting documents need to be available in the public domain.
- Any response that cannot be verified in the attached public document(s) or web link will not be accepted.
