Question: Supply Chain Risk Exposure
Include Modeled Scores : Yes

Supply Chain Risk Exposure

Question

Does your company have a formalized process in place to identify potential sustainability risks in the supply chain?

Rationale

Companies not only outsource production, services and business processes but responsibilities, risks and opportunities as well. On one hand, outsourcing generally tends to increase a company's flexibility, but on the other hand, supply chain risks might become less apparent, new dependencies may arise, and the identification, monitoring and management of risks and opportunities in the supply chain may become more difficult.

This question seeks to assess if companies have a systematic approach to identifying and defining potential sustainability risks in their supply chain. Companies able to properly identify high risk suppliers will also be better positioned to prioritize their risk management measures and proactively detect issues connected to suppliers' ESG performance.

Performance Summary	
Question Level Company Performance	100
Question Weight	19
Year-on-Year Change	0
Industry Average Score	22
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Critical suppliers: They are defined as suppliers whose goods, materials, services (including intellectual property (IP) / patents) have a significant impact on the competitive advantage, market success or survival of the company. Critical suppliers include high-volume suppliers, suppliers of critical components and non-substitutable suppliers.

Tier 1 suppliers: This refers to suppliers that directly supply goods, materials or services (including intellectual property (IP) / patents) to the company.

Tier 2 and lower: They provide their products and services to the supplier at the next level in the chain (E.g. Tier-2 supplies to Tier-1)

Number of suppliers assessed in the last 3 years: This refers to the total number of the suppliers assessed in the last three years (Year 1 + Year 2 + Year 3)

Percentage of suppliers assessed in the last 3 years: This refers to the number of suppliers assessed in the last three years divided by the total absolute number of suppliers in the current year (as provided in the Critical Supplier Identification question). **If a supplier has been assessed multiple times in the last three years, it should only be counted once.**

High-risk supplier: The suppliers that have a high probability of causing an adverse impact on the organization due to social, environmental and/or economic misconduct. The definition of high-risk supplier must contain a set of relevant criteria used for the classification, the rationale for such criteria and the risk level identification process.

Data Requirements

Supporting evidence:

- The document(s) you attached will be used to verify the qualitative part of your response. If a question text field is available, a comprehensive answer in that field can be accepted instead of a supporting document. Any qualitative response that cannot be verified in the attached document(s) or via the information provided in the related question text field (if available) will not be accepted.
- Quantitative figures provided in the response do not need supporting evidence. You may still provide a reference using the reference clip. This could include examples of the underlying calculations or approaches to data aggregation used to compile the provided quantitative information.
- The supporting documents do not need to be available in the public domain.

References

GRI Standards 102-9, 414 & 308 are relevant for this question.

Data View

QUESTION LEVEL INPUT	COMPANY ANSWER
Presence of a formal risk identification process	Applicable
Number of tier 1 suppliers assessed on sustainability risks in the last 3 years	100
Percentage of tier 1 suppliers assessed on sustainability risks in the last 3 years	100
Year to reach the target for tier 1 suppliers (Fiscal Year)	95
Number of critical non-tier 1 suppliers assessed on sustainability risks in the last 3 years	0
Percentage of critical non-tier 1 suppliers assessed on sustainability risks in the last 3 years	Not answered
Year to reach the target of critical non-tier 1 suppliers (Fiscal Year)	Not answered
Number of tier 1 suppliers classified as sustainability high risk suppliers	0
Percentage of tier 1 suppliers classified as sustainability high risk suppliers	0
Number of critical non-tier 1 suppliers classified as sustainability high risk suppliers	0
Percentage of critical non-tier 1 suppliers classified as sustainability high risk suppliers	Not answered

Questionnaire

Does your company have a formalized process in place to identify potential sustainability risks in the supply chain?

1. ◉

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

Yes, we have a formalized process in place.

Formal risk identification process

Please provide a brief description of your company's sustainability risk identification process. Explain, for instance, how your company identifies suppliers with potentially higher sustainability risks, or describe the higher risks which are typically found or expected to be found, or how these potential risks are linked to your overal supply chain management strategy. Please attach supporting documentation showing this process.

Sustainability risk assessment scope and targets

Please indicate the scope of the sustainability risk assessments performed for tier 1 and critical non-tier 1 suppliers. Site visits, questionnaires, external sustainability agencies, stakeholder information, external databases, news watches, etc., are all acceptable types of assessments in this part of the question. **If a supplier has been assessed multiple times in the last three years, it should only be counted once.**

Please also indicate if you have a target in place and by what year that target should be achieved.

Type of supplier	Number of suppliers assessed in the last 3 years	Percentage of suppliers in that category assessed in the last 3 years (based on total number of suppliers in that category provided in "Critical Supplier Identification" question). The values should not exceed 100%.	Description of target
Tier 1 suppliers	100	100	Please provide a description of your target: Target year: 95
Critical non-tier 1 suppliers	0	Not answered	Please provide a description of your target: Target year: Not answered

Definition of "sustainability high-risk"

Please provide the definition or the description that your company uses for "sustainability high-risk".

Share of sustainability high-risk suppliers

Please indicate the current share of your company's total number of tier 1 suppliers (both critical and non-critical) as well as the share of your non-tier 1 suppliers for which you have identified a high level of sustainability risk in the table below. **If you have not identified any suppliers as being high sustainability risk, please report "0" in the relevant fields. This information will be used in the proceeding question "Risk Management Measures".**

Type of supplier	Number of suppliers classified as high-risk	Percentage of total suppliers in that category classified as high-risk (based on total number of suppliers in that category provided in "Awareness" question). The values should not exceed 100%.
Tier 1 suppliers	0	0
Critical non-tier 1 suppliers	0	Not answered
Total suppliers		

2. ○ No, we do not have a formalized process to assess sustainability risks in the supply chain
3. ○ Not applicable. Please provide explanations in the comment box below.
4. ○ Not known
