Supply Chain Transparency & Reporting

Question

Which aspects of your supply chain management approach does your company publicly report on (on a consolidated basis)?

Rationale

Companies not only outsource production, services and business processes but responsibilities, risks and opportunities as well. On one hand, outsourcing generally tends to increase a company's flexibility, but on the other hand, supply chain risks might become less apparent, new dependencies may arise, and the identification, monitoring and management of risks and opportunities in the supply chain may become more difficult.

To ensure credibility and trust amongst investors as well as other stakeholders, it is crucial that companies transparently report on processes as well as results connected to their supply chains. This question seeks to assess the extent to which companies are publicly reporting on aspects regarding supplier risk and performance.

Performance Summary	
Question Level Company Performance	30
Question Weight	20
Year-on-Year Change	18
Industry Average Score	13
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

This question aims to assess the transparency of the company's supply chain reporting. Therefore, all the information presented here must be available in the public domain, and preferably referenced through a web link.

- **Spend analysis:** This refers to a full assessment of the supply chain, including information on each supplier. A typical spend analysis would include number of suppliers, category type, spend value and geographic spread. Please bear in mind that this analysis refers to the structure of the supply chain as a whole and does not specifically focus on environmental, social and governance (ESG) assessments of the supply chain.
- **Disclosure of risk awareness:** This refers to disclosures around the definition and identification of critical tier-1 and non-tier 1 suppliers.
- **Disclosure of risk assessment and corrective actions:** This refers to measures taken to identify and mitigate identified risks, such as the approach to supplier assessments, monitoring and corrective action plans.

- **Examples of KPIs relating to supply chain management:** These include (but are not limited to): percentage of assessed suppliers, percentage of audited suppliers, KPIs related to the outcome of capacity-building activities, percentage of suppliers with contract clauses, percentage of suppliers with ISO14001 (or similar), percentage of procurement spent with preferred suppliers (according to sustainability criteria), number of suppliers rejected for sustainability reasons, scope 3 missions, suppliers' water use, percentage of procurement staffed trained on sustainability aspects. For each KPI reported, we also request details of targets and progress made towards meeting those targets.

Data Requirements

- The KPI must be quantitative and disclosed in the public domain
- Each KPI should have a target
- Each target should have a target year
- Progress on the target should be publicly disclosed

Data View

QUESTION LEVEL INPUT	COMPANY ANSWER
Company publicly reports its supply chain management approach	Applicable
Supply chain spend analysis (number of suppliers, category, spend value and geographical spread)	YES
Supply chain awareness (identification of critical suppliers)	YES
Supply chain risk assessment and corrective actions (e.g. supplier sustainability assessment)	YES
ESG integration in SCM strategy (e.g. minimum thresholds or alignment of overall SCM strategy with ESG objectives)	-
Supply chain management sustainability Target year 1 (Fiscal Year)	Not answered
Supply chain management sustainability Target year 2 (Fiscal Year)	Not answered
Supply chain management sustainability Target year 3 (Fiscal Year)	Not answered

Questionnaire

Which aspects of your supply chain management approach does your company publicly report on (on a consolidated basis)?

1. ◉

   We publicly report our supply chain management approach

   Supply chain management approach transparency

   Please attach supporting evidence and/or website where the information can be found in the public domain.

   1. ☑

      Supply chain spend analysis (containing basic spend analysis information such as: number of suppliers, category, spend value and geographical spread)

   2. ☑

Supply chain awareness (identification of critical suppliers)

3. ☑ Supply chain risk assessment and corrective actions (e.g. supplier sustainability assessment)

4. ☐ ESG integration in supply chain management strategy (e.g. minimum thresholds or alignment of overall supply chain management strategy with ESG objectives)

Reporting quantitative KPIs and targets

Please indicate below the extent to which your company reports on supply chain management sustainability key performance indicators (KPIs) in the public domain and provide the targets linked to these indicators. The Annual Report, Sustainability Report and corporate website are considered to be relevant public communication sources.

If available, please select KPIs with at least **three years of history**, well defined **targets** and clear reporting on **progress towards these targets.**

	Please specify the KPI and attach the public reference together with the page number where the supply chain indicator is publicly reported:	**Please specify the target that is linked to the KPI and attach the public reference together with the page number where the target of the supply chain indicator is publicly reported:**
KPI 1	KPI:	Target: Target year: Not answered
KPI 2	KPI:	Target: Target year: Not answered
KPI 3	KPI:	Target: Target year: Not answered

2. ○ We do not quantitatively report on sustainability KPIs

3. ○ Not applicable. Please provide explanations in the comment box below.

4. ○ Not known
