Question: Employee Development Programs
Include Modeled Scores : Yes

Employee Development Programs

Question

Does the company have programs on employee development?

Rationale

One of the challenges companies face is to fully understand the positive business and financial effects of investing in employees and whether the investments they are making are having the desired impact on their people and their organizations. This question measures how and to what degree companies can measure the benefits to their business of their investments in human capital by describing two examples of employee development programs, demonstrating their benefits to the business and asking whether companies are able to quantify these benefits. For investors, understanding whether companies are maximizing the benefits of their investments into people can be key to understanding how efficiently capital is deployed across the organization and how companies are making forward looking, strategic investments in their people.

Performance Summary	
Question Level Company Performance	40
Question Weight	40
Year-on-Year Change	(30)
Industry Average Score	30
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Employee development programs: it refers to programs that have been developed to enhance or improve your employees' skills. They can be functional, leadership, on the job-trainings such as leadership or management development programs, young talent development programs, sales training for sales executives, green or black belt certifications, project management training etc. This does not cover programs providing employees with the basic skills they need to carry out their daily work or to help them reach certain minimum requirements, such as mandatory compliance training, annual recertification programs, basic OHS or workplace security training, board training for new board members, training programs that are necessary to bring new employees up to a minimum standard in order to fulfil their job requirements, graduate/ trainee or apprenticeship programs.

Name & Description of the program: companies are expected to provide specific example of programs and explain how they can provide business benefit. General reference to the existing of a Learning Academy or Institute or purchase of LinkedIn Learning license is not sufficient

Description of program objective/business benefits: it refers to the benefits that the company derives as a result of providing the training, not the benefits for the employee undertaking the training. Of course, programs may result in benefits to both the company and the employees. This should not be a description of the employee development program but rather an explanation of how the program aids the company's overall performance or helps it meet its strategic targets.

Quantitative impact of business benefits: they refer to either monetary or non-monetary metrics that a company uses to track and measure the impacts of its development programs. These metrics should be directly linked to the employee development program described in terms of a measurable outcome as a relevant indicator of more effective business performance. Examples include but are not limited to quantitative information showing changes in employee engagement, employee turnover, efficiency, productivity, revenue generation cost savings, sales, internal employee promotions, employee retention etc. (i.e. specific statements of x% increase in employee engagement, x% decrease in employee turnover etc.) This does not refer to the number of trainees/ participants or any qualitative description of the beforementioned metrics (i.e. statements like "increased number of trainees", "increase in employee engagement" etc.)

FTEs: Full-Time Equivalents is the number of working hours that represents one full-time employee during a fixed time period, such as one month or one year. The concept is used to convert the hours worked by several part-time employees into the hours worked by full-time employees.

Percentage of FTEs participating in the program: it refers to percentage of FTEs actively participating/ made use of the program, not the number of people that are eligible or have access to the program, out of the total amount of FTEs in the latest reporting year.

Data Requirements

- Companies with less than 100 employees (e.g. investment offices and vehicles, funds, holding companies, etc.) should mark this question Not Applicable.
- Companies should select the programs they will report on based on their strategic importance. Companies should select programs which they can sufficiently demonstrate their business impact than select the programs that have simply higher employee coverage; "% of FTEs participating in the program" field is appraised only on disclosure and therefore greater values of employee coverage will not necessarily lead to a better scoring performance for this question.
- **Quantitative impact of business benefits**: The quantitative impact reported should be linked to the program's business benefit described in the previous field and not unrelated.
- **Supporting Evidence:** Please share a document and indicate the relevant page where the selected programs are described. At least the Program "Name & Description of the program" information should be verifiable in this document

Supporting evidence:

- The document(s) you attached will be used to verify the qualitative part of your response. If a question text field is available, a comprehensive answer in that field can be accepted instead of a supporting document. Any qualitative response that cannot be verified in the attached document(s) or via the information provided in the related question text field (if available) will not be accepted.
- Quantitative figures provided in the response do not need supporting evidence. You may still provide a reference using the reference clip. This could include examples of the underlying calculations or approaches to data aggregation used to compile the provided quantitative information.
- The supporting documents do not need to be available in the public domain.

References

GRI Standard 404-2 is relevant for this question.

Data View

QUESTION LEVEL INPUT	COMPANY ANSWER
Company's Employee Development Programs	Applicable
Percentage of total employees that have participated program 1	1
Percentage of total employees that have participated program 2	Not answered

Questionnaire

Please provide two examples of employee development programs in your company that have been developed to upgrade and improve employee skills. Please fill out the fields of the table and provide supporting evidence.
