Human Capital Return on Investment

Question

Does the company publicly report the following information on a standard human capital return on investment metric, serving as a global measure of the return of the company's human capital programs?

Rationale

The Human Capital Return on Investment provides a means of measuring company's profitability in relation to total employee costs. It is derived by removing non-employee costs from overall operating costs and deriving the resulting operating profitability. This metric provides a view into the degree to which economic value is derived looking at profitability solely in relation to human capital costs.

Performance Summary	
Question Level Company Performance	100
Question Weight	30
Year-on-Year Change	70
Industry Average Score	64
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Total Revenue: it refers to the amount your company has received in revenues before any deductions are made.

Total operating expenses: it refers to all the expenses your company has from its operations. It should be in line with accepted financial accounting and reporting standards including everything a company will have defined in their income statement.

Total employee-related expenses (salaries + benefits): this includes training and development programs, pensions, hiring, etc., as it covers all costs directly related to employees.

Data Requirements

- Companies with less than 100 employees (e.g. investment offices and vehicles, funds, holding companies, etc.) should mark this question Not Applicable.
- By subtracting Total Operating Expenses (b) less Total employee-related expenses (salaries + benefits) (c) from Total Revenue (a), your company's profitability prior to human capital costs are calculated. Dividing this figure by Total employee-related expenses (salaries + benefits) (c) then leads to the ratio that examines your company's level of profitability in relation to the total human capital expenses.

Supporting evidence:
No document is required to support your response. You may still provide a reference using the reference clip. This could include examples of the underlying calculations or approaches to data aggregation used to compile the provided quantitative information.
