Workforce Breakdown: Other Minorities

Question

Does your company publicly disclose on the breakdown of its workforce based on the diversity indicators provided below?

Rationale

We assess various Labor KPIs of an organization to determine not only the quality, but also the transparency of its reporting on diversity issues. Diversity can improve a company's performance as it increases the likelihood of bringing people with different types of knowledge, views and perspectives together. This diversity results in better innovative and problem-solving skills, improves talent attraction and retention, increases employee engagement and results in higher efficiency. Several initiatives have already been taken by shareholders and governments to increase the share of minorities in the workforce and in leadership positions. Companies who are early adopters of inclusive hiring and retention practices will therefore benefit from positive recognition and lower compliance costs in the future.

This question specifically assesses companies' diversity and inclusion practices by asking for the proportion of employees which self-identify as part of underrepresented groups, such as having a disability or being LGBTQI+. Companies can also choose to report on age breakdowns, as we know that populations are ageing across many countries and that age discrimination cannot be tolerated. A lack of diversity exposes companies to great legal and reputational risks as various stakeholders pay increasing attention to companies' workforce balance.

Performance Summary	
Question Level Company Performance	100
Question Weight	18
Year-on-Year Change	0
Industry Average Score	50
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Self-identification: This refers to the assigning of a particular characteristic or categorization to oneself. In this question, if reporting on disability or LBTQI+, we ask for the proportion of employees who self-identify as such, meaning that they have expressed their identification with this characteristic rather than having been assigned it by others based on physical or other judgements.

LGBTQI+: Lesbian, gay, bisexual, transgender, queer or/and intersex. Rather than being an exhaustive list, this term refers to people who self-identify as having sexual orientations and/or gender expressions which are non-hegemonic and/or non-binary.

People with disability: People who have long-term physical, mental, intellectual or sensory impairments which in interaction with various barriers may hinder their full and effective participation in society on an equal basis with others. A disability can be visible or non-visible or a combination of both.

Other: Based on cultural and social contexts, other diversity indicators might be more relevant to a company's workforce. This includes for example veterans or former prisoners.

Coverage: The coverage corresponds to the scope of the data reported on. For example, if a company only reports on its employees in one country, and these employees represent X% of the total workforce, then the company should select the bracket which includes this X%. If the company gave the opportunity to self-report to its employees, but a proportion of these employees have actively decided to refrain from providing this personal data, the proportion of these employees can still be included as part of the coverage.

Data requirements

Disclosure requirements for public question: We do not expect all the information to be disclosed. This question is scored on the availability of one indicator (disability, LGTQI+ identification, age or another relevant category) in the public domain.

Regarding the coverage, we recognize that not all types of data can be collected in all parts of the world. Please select **the coverage bracket** which covers the employees you are reporting on. You will not be penalized for not reporting on the full coverage of your FTEs as we recognize that the data is complex to consolidate at the global level.

According to **the Article 9 of the GDPR,** the processing of data concerning health or data concerning a natural person's sex life or sexual orientation is prohibited, except if the data subject has given explicit consent to the processing of this personal data, provided this is not prohibited by national law. Other exemptions exist, such as reasons of substantial public interest which might include statistical research purposes for equality of opportunity and treatment. However, if as a result, your company does not collect data regarding disability or LGBTQI+ identification, please report on the distribution of your workforce according to ages groups. You will not be penalized for only providing age data. However, the option "Not applicable" will **not** be accepted as in that case, we expect disclosure on age groups.

Questionnaire

Does your company publicly disclose on the breakdown of its workforce based on the diversity indicators provided below? If so, please complete the table accordingly. Please attach supporting public evidence where indicated and provide the coverage reported on as a percentage of FTEs.

We do not expect companies to report on all three indicators. We expect at least one of these indicators (disability, LGTQI+ identification, age or another relevant category) to be reported publicly.

1. ○

   Yes, we monitor the breakdown of our workforce according to the following diversity indicators:

Diversity Indicator	% of FTEs	Coverage
People with disability		Please select
LGBTQI+		Please select
Age groups:		Please select
<30 years old		
30-50 years old		
>50 years old		
Other, please specify:		Please select

2. ○

   No, we do not publicly disclose the breakdown of our workforce according to these minorities.

3. ○

   Not applicable. Please provide explanations in the comment box below.

4. ○

   Not known
