Strategic Workforce Planning

Question

Is your company currently applying People Analytics for your strategic workforce planning?

Rationale

One of the most common areas where companies have started applying People Analytics is in their Strategic Workforce Planning. By applying data analysis, companies try to estimate future company's workforce needs along with studying external landscape. For example, they can estimate how many new and replacement hires will be needed in the months or years ahead, gather data for current turnover and work with business strategists to understand where and how growth will occur. This helps companies to earlier address risks that may occur or capitalize on opportunities by finding solutions to better manage talents.

Performance Summary	
Question Level Company Performance	0
Question Weight	5
Year-on-Year Change	0
Industry Average Score	47
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

FTEs: Full-Time Equivalents is the number of working hours that represents one full-time employee during a fixed time period, such as one month or one year. The concept is used to convert the hours worked by several part-time employees into the hours worked by full-time employees.

Workforce planning: It is the long-term planning aiming at "the strategic alignment of an organization's human capital with its business direction. It is a methodical process of analyzing the current workforce, determining future workforce needs, identifying the gap between the present and the future, and implementing solutions so the organization can accomplish its mission, goals, and objectives." (Minnesota Management and Budget cited, HR Society 2013, p.3).

Types of Workforce planning

- Strategic planning: long-range planning, usually covering a 3 to 5 year forecast period, aligned to business needs and outcomes. It focuses on identifying the workforce implications, current, transition and future of business strategic objects and includes scenario planning.
- Operational planning: mid-range planning, usually covering the next 12 to 18 months. It should align with the timeframe of the business planning cycle. It is the process and systems applied to gathering, analyzing and reporting on workforce planning strategy.
- Tactical or short-range planning: it takes place once a year and is usually part of budgeting.

Data Requirements

- Companies with fewer than 100 employees (e.g. investment offices and vehicles, funds, holding companies, etc.) should mark this question Not Applicable.
- This question is different from the People Analytics (PA) question. This question requires a more detailed description of the company's Strategic Workforce Planning (SWP). In the People Analytics question, companies are asked if they collect and analyze HR related data through the application of statistics or other data interpretation techniques in different practices (e.g. in order to measure employee performance, in their recruiting & hiring processes, etc.). The Strategic Workforce Planning question focuses only on the application of PA in SWP and requires extensive description of the purpose of the analysis, the method/tool used and the result of the analysis.
- Companies that have more than one relevant processes in place should report on the one that they perceive as the most strategic and for which they can provide the best description of the opportunity, the process / tools / techniques / methods / models used and their outcomes.

Description: An acceptable description should include the following elements:

- **Opportunity: Why does the company apply People Analytics in Strategic Workforce Planning?** The aim of the activity or the purpose the company is seeking to address with such analysis should be described. For example, a company may be investing in analytics in order to combat high voluntary employee turnover.
- **Action: How People Analytics have been used?** Description of process / tools / techniques / methods / models being used to collect and use the necessary data and the type of data that is used. For example, a company builds and rolls out dashboards of data on headcounts, employee engagement, compensation or a company develops predicting models to analyze the data already collected.
- **Outcome: What is the business impact/result of the initiative?** For example, a company is able to develop models to effectively predict employees with high flight risk, modify its strategy and thereby lower voluntary employee turnover.

Supporting evidence: please provide supporting documentation (private or public) that will help better support the description of your PA application in SWP. Any type of supporting evidence that can demonstrate the type of analysis conducted is acceptable (e.g. screenshots of online systems, documents of application procedures, documentation of a successful application case, comprehensive comments, ...).

- The document(s) you attached will be used to verify your response.
- The supporting documents do not need to be available in the public domain.
- If a question text field is available, a comprehensive answer in that field can be accepted instead of a supporting document.
- Any response that cannot be verified in the attached document(s) or via the information provided in the related question text field (if available) will not be accepted.

Questionnaire

Does your company currently use People Analytics (PA) for your Strategic Workforce Planning (SWP)?

If your company has different processes in place for different business unit, please select one that you perceive as the most strategic and it is more broadly applied within your organization.

For further clarifications, please consult the information text.

1. ○ Yes. Please describe the process in the table below and provide supporting evidence:

   Please indicate what is the application coverage of the process described (in percentage of global FTEs):

   Please select

   Description

   Opportunity: Why does your company use PA for SWP?

   Action/process/tool used: How PA have been used?

   Outcome: What is the business impact/result of the initiative?
2. ○ No, we do not use People Analytics for our Strategic Workforce Planning
3. ○ Not applicable. Please provide explanations in the comment box below
4. ○ Not known

Confidential additional comments

Use the text field below only in the following cases: (i) to describe significant changes in data or calculation methodology compared to last year's submission, (ii) to explain why a question is not applicable to your company's business model, (iii) to explain if your data deviates from the unit or format requested, or (iv) to provide supporting notes on translations of non-English references.
