Question: Coverage of Environmental Management Policy
Include Modeled Scores : Yes

Coverage of Environmental Management Policy

Question

Is your company's environmental management policy publicly available? If so, please indicate which of the following options are covered by your policy and indicate and provide supporting evidence of where this is clearly stated in the public domain. All chosen options should be clearly defined in the publicly available policy (i.e. formal policies and not different sections of a report or case study).

Rationale

Corporate environmental guidelines are an important indicator of a company's commitment to measure and reduce the environmental impact of its operations. Companies that have adopted corporate environmental guidelines as a management tool are more likely to improve their environmental performance in a structured and systematic way.

This question identifies the scope of such requirements in terms of operations, corporate processes and supply chain.

Performance Summary	
Question Level Company Performance	80
Question Weight	30
Year-on-Year Change	0
Industry Average Score	32
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.
