Year: Methodology Year: 2022
Question: Water Consumption
Include Modeled Scores : Yes

Water Consumption

Question

Does the company track its freshwater consumption, including water withdrawal and discharge?

Rationale

Producing more with less material is essential for many industries affected by the growing scarcity of natural resources. Operational Eco-Efficiency enhances competitiveness in terms of cost reductions and reduces environmental liabilities. It also enables companies to be better prepared for future environmental regulations. The key focus is on inputs and outputs of business operations and the assessment of trends in the consumption of natural resources and the production of environmental waste products specific to each industry.

Performance Summary	
Question Level Company Performance	86
Question Weight	22
Year-on-Year Change	(4)
Industry Average Score	34
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Total net fresh water consumption(E):= Municipal water (A) + Fresh surface water (B) + Fresh ground water (C) - Water returned to the source of extraction at similar or higher quality as raw water extracted (D). Please do not include salt or brackish water into the reported figures. **Rainwater collected and waste water should not be reported.** Only water used for cooling and returned to the source at equal or higher quality should be reported under item D.

Total municipal water supplies: All water supplied directly by the municipality and/or other public or private water utilities.

Fresh surface water (lakes, rivers, etc.): It includes water from wetlands, rivers, lakes. Do not include sea water.

Fresh ground water: Fresh water from below the surface. Do not include brackish ground water

Water quality: To define the levels of water quality, we consider the quality categorization of the Minerals Council of Australia (MCA) as a good approach to be followed:

Category 1: Water is of a high quality and may require minimal and inexpensive treatment (for example water disinfection and pond settlement of solids) to raise the quality to appropriate drinking water standards.

Category 2: Water is of a medium quality with individual constituents encompassing a wide range of values. It would require moderate level of treatment such as disinfection, neutralization, removal of solids and chemicals to meet appropriate drinking water standards.

Category 3: Water is of a low quality with individual constituents encompassing high values of total dissolved solids, elevated levels of dissolved metals or extreme levels of pH. It would require significant treatment to remove dissolved solids and metals, neutralize and disinfect to meet appropriate drinking water standards.

Data requirements

Disclosure requirements for partially public question. Additional credit will be granted for relevant publicly available evidence covering the following aspect of this question:

- Total net fresh water consumption for at least the most recent reported year.

Third-party verification: For third-party verification, we expect that data in the most recent year reported has been third-party verified and that relevant documentation is attached showing this verification. Internal audits or verification will not be considered.

Data consistency

- If the environmental performance data reported in the questionnairedo not correspond to the publicly reported figures, the correspondingoption should be marked and the discrepancy should be explained. Thisoption should not be indicated if the information is not publicly reported at all.
- If there is a temporary reduction in coverage due to, for example, a major acquisition, the corresponding box should be marked and the reduction should be explained.
- If it is not possible to report the figures in absolute terms, the data should be reported in relative terms and the corresponding box should be ticked. Please note that information should always be reported in absolute terms if possible, even if it deviates from public reporting.

General data requirements

Environmental performance data should cover the activities of the entire company with the same consolidation as usedin financial reporting and must refer to the financial year (e.g., 01/01 to 31/12 for both financial and environmental data) and be aligned with the figures reported in the Company Information section

Target: We require the absolute target for the most recent reporting year. If your company has a multiple year and/or relative target, please extrapolate what the target value would have to be for the last financial year to make sure you are progressing well towards achieving the target by the end of the target period.

In particular, environmental data of group companies should follow the following rules:

· Environmental data of companies that are consolidated at-equity must not be considered.

· Environmental data of companies that are consolidated proportionally must be considered to the proportion at which they are consolidated financially.

· Environmental data of companies that are fully consolidated must be fully considered irrespective of the proportion to which they belong to the group.

· Environmental data of business travel other than by owned and/or operated fleet should not be included unless specifically asked for.

· Environmental data should refer to the specific company structure of each particular year. There should be no pro-forma backward consolidation of the current company structure.

· Environmental data of companies that are sold or no longer consolidated should be excluded from environmental data as of the reporting period in which the company has not been consolidated anymore.

· Environmental data of companies that have been bought should only be included as of the reporting period in which the company is consolidated financially for the first time.

· Where environmental data does not cover all consolidated activities of the company, the scope should be indicated together with the environmental data that is known.

· Where the reported environmental data deviates from these definitions you are asked to explain in what way the data provided differs from the definitions.

· If a company publicly reports on long-term but not annual targets, an annual target has to be estimated based on internal target setting or a linear distribution.

· The data must be provided in the unit indicated in the question. If the company is tracking the specific indicator in a different unit, the unit converter must be used to convert the data into the preferred unit.

· Please ensure that the Company Information section has been correctly filled in, and that the coverage in the table below is based on the same denominator.

Data View

QUESTION LEVEL INPUT	COMPANY ANSWER
Company's total net fresh water consumption, including data for fresh water extraction and consumption available	Applicable
Withdrawal: Total municipal water supplies (or from other water utilities) (2018) (Million m³)	4.154
Withdrawal: Total municipal water supplies (or from other water utilities) (2019) (Million m³)	4.492

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

QUESTION LEVEL INPUT	COMPANY ANSWER
Withdrawal: Total municipal water supplies (or from other water utilities) (2020) (Million m³)	4.809
Withdrawal: Total municipal water supplies (or from other water utilities) (2021) (Million m³)	4.777
Withdrawal: Fresh surface water (lakes, rivers, etc.) (2018) (Million m³)	0.000
Withdrawal: Fresh surface water (lakes, rivers, etc.) (2019) (Million m³)	0.000
Withdrawal: Fresh surface water (lakes, rivers, etc.) (2020) (Million m³)	0.000
Withdrawal: Fresh surface water (lakes, rivers, etc.) (2021) (Million m³)	0.000
Withdrawal: Fresh groundwater (2018) (Million m³)	1.060
Withdrawal: Fresh groundwater (2019) (Million m³)	1.082
Withdrawal: Fresh groundwater (2020) (Million m³)	1.076
Withdrawal: Fresh groundwater (2021) (Million m³)	1.156
Discharge: Water returned to the source of extraction at similar/higher quality as raw water extracted (2018) (Million m³)	Not answered
Discharge: Water returned to the source of extraction at similar/higher quality as raw water extracted (2019) (Million m³)	Not answered
Discharge: Water returned to the source of extraction at similar/higher quality as raw water extracted (2020) (Million m³)	Not answered
Discharge: Water returned to the source of extraction at similar/higher quality as raw water extracted (2021) (Million m³)	Not answered
Total water use (2018) (Million m³)	5.215
Total water use (2019) (Million m³)	5.574
Total water use (2020) (Million m³)	5.885
Total water use (2021) (Million m³)	5.933
Water use target for last fiscal year reported (Million m³)	Not answered
Water use: Data coverage (2018)	100
Water use: Data coverage (2019)	100
Water use: Data coverage (2020)	100
Water use: Data coverage (2021)	100
Public reporting: Water consumption data is publicly available	YES
Third party verification: Water use data verified by third party for most recent fiscal year reported	YES
Data consistency: Water consumption data reported in the questionnaire differs from publicly available data	-
Data consistency: Temporary coverage reduction or target challenge in water consumption data due to corporate actions	-
Data consistency: Water consumption data is not reported in absolute terms and is normalized	-

Questionnaire

Please provide your company's total net fresh water consumption, including data for fresh water extraction and consumption. Please refer to the information button for additional information. For each row in the table, it is mandatory that the values are provided in the same unit. Also, please ensure that you have correctly filled in the Company Information section at the beginning of the questionnaire, and that the coverage in the table below is related to the denominator relevant for your company as indicated in that section. **If your company's final product is water (e.g. water utilities), please mark "Not applicable" in this question.**

1. (●)

Water Consumption	Unit	Financial Year 2018	Financial Year 2019	Financial Year 2020	Financial Year 2021	Please indicate what was your target for the FY 2021
A. Withdrawal: Total municipal water supplies (or from other water utilities)	Million cubic meters	4.15446343	4.491848	4.809086	4.776675	
B. Withdrawal: Fresh surface water (lakes, rivers, etc.)	Million cubic meters	0	0	0	0	
C. Withdrawal: Fresh groundwater	Million cubic meters	1.060239	1.081953	1.075748	1.156251	
D. Discharge: Water returned to the source of extraction at similar or higher quality as raw water extracted (only applies to B and C)	Million cubic meters	Not answered	Not answered	Not answered	Not answered	
E. TOTAL NET FRESH WATER CONSUMPTION (A+B+C-D)	Million cubic meters	5.21470243	5.573801	5.884834	5.932926	Not answered
Data Coverage (as % of denominator)	percentage of	100	100	100	100	

PUBLIC REPORTING

1. [x] Our data is publicly available. Please provide supporting evidence or web link.

THIRD PARTY VERIFICATION

1. [x] Our data has been third-party verified in the most recent financial year reported. Please provide supporting evidence.

DATA CONSISTENCY

1. [ ] We report publicly on this information, but the data in the table above differs from our publicly reported figures. Please provide an explanation in the comment box for this difference:
2. [ ] We have a temporary coverage reduction or target challenge due to corporate actions. Please briefly explain if a merger, acquisition, divestment, etc. has temporarily caused a reduction in your ability to report optimal coverage or caused your target to appear abnormal:
3. [ ] We are not able to report this information in absolute terms, the information provided in the table above is normalized data. For the purpose of this question, please always provide absolute figures if available.

2. ( ) We do not track water withdrawal.
3. ( ) Not applicable. Please provide explanations in the comment box below.
4. ( ) Not known

Confidential additional comments

Use the text field below only in the following cases: (i) to describe significant changes in data or calculation methodology compared to last year's submission, (ii) to explain why a question is not applicable to your company's business model, (iii) to explain if your data deviates from the unit or format requested, or (iv) to provide supporting notes on translations of non-English references.
