Online Strategies & Customers Online

Question

Does the company track information regarding the use of its online services by customers and the revenue generated from such services?

Rationale

All industries are facing an increased speed of information flow toward their customers. Companies need to adapt to thisdynamically changingenvironment, in developed*and* emerging markets. To ensure acompany's reputation, increase revenue generation and improve customer engagement, companies need to develop an online strategy.We assess if companies have defined a group-wide online strategy covering overall development capabilities. This question is looking for information covering the overall positioning of the company with respect to online business practices that ensure reputation and recognition by using online tools and digital presence to improve business performance. To benefit from these new platforms, companies also have to monitor the percentage of customers online and percentage of revenue from e-commerce, direct online sales systems and/or advertising.

Performance Summary	
Question Level Company Performance	64
Question Weight	46
Year-on-Year Change	0
Industry Average Score	30
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Customer: One buying services or goods from another. In the context of this questionnaire, we focus on *customers* for B2B companies.

Consumer: One consuming a particular product or commodity. In the field of economics, a consumer can either be a single person or an entire organization using a certain type of service. In the context of this questionnaire, we focus on *consumers* for B2C companies.

Data Requirements

% of total customers using your online services solutions/sales platform: percentage of total customers that make use of/come from online products and services in the last four financial years.

% of revenues generated online (e.g. through direct sales, advertising, etc.): percentage of total revenues generated through online channels in the last four financial years.

Target: We require the absolute percentage target for the most recent reporting year (i.e. a target of 15% of revenues generated online for the previous fiscal year, **not** a yearly 2% increase in online revenues over the previous three fiscal years). If your company has a multiple-year and/or relative increase target, please extrapolate what the target value would have to be for the last financial year to make sure you are progressing well towards achieving the target by the end of the target period.

Applicability: Please note that if your company has **more than 95% of revenues generated online** in the previous fiscal year this question should be marked as '**Not applicable**' and an explanation should be provided in the comment box.

In addition, if your company does not directly sell online and has no further access to online customers, please select *"We do not generate sales/revenues from online activities. Please explain."*

For companies providing **pure IT solutions without selling products or operating traditional retail outlets**, this question should be marked "**Not Applicable**". IT solutions include online services, customized applications (both online and offline) as well as consulting services.

Supporting evidence:

No document is required to support your response. You may still provide a reference using the reference clip. This could include examples of the underlying calculations or approaches to data aggregation used to compile the provided quantitative information.
