Question: Health & Nutrition Policy
Include Modeled Scores : Yes

Health & Nutrition Policy

Question

Does the company have a policy on health & nutrition and is it available publicly?

Rationale

An important step towards a healthier society is consumer empowerment. Consumers need proper education about food, nutrition content, and how a balanced diet can contribute to high energy levels, health and longevity. However, education is worthless if basic information about ingredients and nutrition levels is not accessible. Therefore, it is food producers' and retailers' responsibility to make nutritional information available to their customers.

Performance Summary	
Question Level Company Performance	100
Question Weight	33
Year-on-Year Change	0
Industry Average Score	28
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

EU CIAA/FDE nutrition labeling scheme: In 2006, the Confederation of the Food and Drink Industry of the EU (CIAA, now FDE - FoodDrinkEurope) made a commitment to implement a voluntary nutrition-labelling scheme for the entire food and drink industry across all EU Member States. The scheme is based on internationally accepted and scientifically-derived Guideline Daily Amounts (GDAs) and aims to encourage consumers to adopt a balanced diet as part of an overall healthy lifestyle.

Data Requirements

For **companies producing only alcoholic beverages:** Please mark this question and all other questions in this criterion as Not Applicable.

For **bottling companies:** Please answer these questions based on the strategies, approaches and initiatives of the beverage producers you work with.

Supporting evidence:

- The document(s) you attached will be used to verify the qualitative part of your response. If a question text field is available, a comprehensive answer in that field can be accepted instead of a supporting document. Any qualitative response that cannot be verified in the attached document(s) or via the information provided in the related question text field (if available) will not be accepted.
- Quantitative figures provided in the response do not need supporting evidence. You may still provide a reference using the reference clip. This could include examples of the underlying calculations or approaches to data aggregation used to compile the provided quantitative information.
- The supporting documents do not need to be available in the public domain.
