OHS Programs

Question

Does the company have a program on Occupational Health and Safety (OHS)?

Rationale

Poor occupational health and safety (OHS) performance has a direct negative impact on labor costs through lower productivity. Lower performance not only poses a threat to a company's reputation and staff morale but also results in increased operating costs in the form of fines and other contingent liabilities. With this question, we aim to find out how a company ensures effective management of health risks/issues and to identify companies that have dedicated programs to Occupational Health and Safety.

The OHS programs should cover a set of actions that ensure a robust, credible, and reliable OHS management system. It aims at providing tools to assess and improve performance in the prevention of workplace incidents and accidents via the effective management of hazards and risks in the workplace.

Performance Summary	
Question Level Company Performance	80
