Additional Disclosure

Year: Methodology Year: 2023
Question: Direct Greenhouse Gas Emissions (Scope 1)
Include Modeled Scores : Yes

Direct Greenhouse Gas Emissions (Scope 1)

Question

Does the company track its direct greenhouse gas emissions (Scope 1)?

Rationale

The purpose of this question is to capture the company's direct greenhouse gas (Scope 1) emissions and assess the overall trend. Emissions can serve as a critical indicator of a company's impact on the climate. Increasingly, the disclosure of emissions is expected from investors, and growing regulatory pressure has led to the mandatory disclosure of certain emissions. By disclosing emissions, investors and stakeholders can ascertain a company's climate risks and identify trends in emissions reduction to benchmark against competitors.

Performance Summary	
Question Level Company Performance	100
Question Weight	34
Year-on-Year Change	0
Industry Average Score	42
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

GHG scope 1: Greenhouse gas emissions (GHGs) refer to emissions of the six main GHGs that are covered by the Kyoto Protocol. These gases are outlined below. Each GHG has a different capacity to cause global warming, depending on its radiative properties, its molecular weight and its lifespan in the atmosphere.

Greenhouse Gases covered by the Kyoto Protocol:

Carbon Dioxide - CO2: Emitted mainly from the burning of fossil fuels, carbon dioxide accounted for some 86 percent of the UK's human-induced (anthropogenic) GHG emissions in 2003.

Methane - CH4: Emitted mainly from agriculture, waste disposal, leakage from the gas distribution system and coal mining, methane contributed to over 6 percent of UK anthropogenic GHG emissions in 2003.

Nitrous Oxide - N2O: The main anthropogenic sources of nitrous oxide emissions are agriculture, transport, industrial processes, and coal combustion. Nitrous oxide accounted for approx. 6 percent of UK GHG emissions in 2003.

Hydrofluorocarbons - HFCs, Perfluorocarbons - PFCs and Sulphur Hexafluoride - SF6: Collectively known as "F-gases", these are emitted mainly from air conditioning and refrigeration and industrial processes. Together F-gases accounted for around 2 percent of the UK anthropogenic GHG emissions in 2003.

Offsetting: Only emissions from renewable resources where the emitter can be reasonably confident that greenhouse gas emissions will be naturally offset or neutralized do not need to be reported (Example: woodburning when a company can be reasonably confident that forests will be reforested). Greenhouse gas emissions that have been offset this way need not be reported. This does not include greenhouse gas emissions for which companies are required to be in the possession of CO2 permits. These emissions need to be reported.

Data Requirements

Specific data requirements for Greenhouse gas emissions:

- Greenhouse gas emissions should be reported as metric tons of CO2-equivalents.
- Data on greenhouse gas emissions should only include CO2 and all other greenhouse gas emissions.
- All greenhouse gas emissions emitted directly by the company should be reported.
- Offsetting: Only emissions from renewable resources where the emitter can be reasonably confident that greenhouse gas emissions will be naturally offset or neutralized do not need to be reported (Example: wood-burning when a company can be reasonably confident that forests will be reforested). Greenhouse gas emissions that have been offset this way need not be reported. This does not include greenhouse gas emissions for which companies are required to be in the possession of CO2 permits. These emissions need to be reported.
- Greenhouse gas emissions of owned and/or managed fleet must be included.
- Greenhouse gas emissions due to commuting of employees should not be included.
- Greenhouse gas emissions of business travel other than by owned and/or operated fleet should not be included.

Disclosure requirements for partially public question. Additional credit will be granted for relevant publicly available evidence covering the following aspect of this question:

- Direct Greenhouse Gas Emissions (Scope 1) figure for at least the most recent reported year.

Third-party verification: For third-party verification, we expect that data in the most recent year reported has been third-party verified and that relevant documentation is attached showing this verification. Internal audits or verification will not be considered.

Please note: In case the company has **reported a value of zero** in the table, third-party verification or supporting evidence is required (e.g., comprehensive comment, internal documentation or public reporting) to substantiate the zero reported.

Data Consistency

- If the environmental performance data reported in the questionnaire do not correspond to the publicly reported figures, the corresponding option should be marked and the discrepancy should be explained. This option should not be indicated if the information is not publicly reported at all
- If there is a temporary reduction in coverage due to a corporate action, the corresponding box should be marked and the reduction should be explained
- If it is not possible to report the figures in absolute terms, the data should be reported in relative terms and the corresponding box should be ticked. Please note that information should always be reported in absolute terms if possible, even if it deviates from public reporting.
- If GHG emissions are only reported and tracked as combined Scope 1 and Scope 2 emissions, the combined figures should be indicated in this question, the corresponding box should be ticked and the following question, EP – Indirect Greenhouse Gas Emissions (Scope 2), should be marked as Not Applicable.

General Data Requirements

Environmental performance data should cover the activities of the entire company with the same consolidation as used in financial reporting and must refer to the financial year (e.g., 01/01 to 31/12 for both financial and environmental data) and be aligned with the figures reported in the Company Information section.

Target: We require the absolute target for the most recent reporting year. If your company has a multiple-year and/or relative target, please extrapolate what the target value would have to be for the last financial year to make sure you are progressing well toward achieving the target by the end of the target period. If you report a combined Scope 1 + Scope 2 target, please extrapolate the share equivalent to the absolute Scope 1 emission for inclusion in the table.

As a consequence, environmental performance data should only cover the direct emissions/resource use, i.e., resource use/emissions caused by the company and its consolidated activities. Emissions and resource use of suppliers and customers should be excluded. In particular, the environmental data of group companies should follow the following rules:

- Environmental data of companies that are consolidated proportionally must be considered to the proportion at which they are consolidated financially.
- Environmental data of companies that are fully consolidated must be fully considered irrespective of the proportion to which they belong to the group.
- Environmental data should refer to the specific company structure of each particular year. There should be no pro-forma backward consolidation of the current company structure.
- Environmental data of companies that are sold or no longer consolidated should be excluded from environmental data as of the reporting period in which the company has not been consolidated anymore.
- Environmental data of companies that have been bought should only be included as of the reporting period in which the company is consolidated financially for the first time.
- Where environmental data does not cover all consolidated activities of the company, the coverage should be indicated together with the environmental data that is known.
- Indicators where a company has no emissions/resource use, 0 should be filled.
- Where the reported environmental data deviates from these definitions you are asked to explain in what way the data provided differs from the definitions.
- If a company publicly reports on long-term but not annual targets, an annual target has to be estimated based on internal target setting or a linear distribution.
- The data must be provided in the unit indicated in the question. If the company is tracking the specific indicator in a different unit, the unit converter must be used to convert the data into the preferred unit.
- Please ensure that the "Company Information" section has been correctly filled in, and that the coverage in the table below is based on the same denominator.

Standards & Frameworks

CDP Climate - C10.1, C5.1a, C6.1, C6.10, C7.9a

EU Taxonomy - Multiple Activities - Substantial Contribution

GISD - Scope 1 emissions

GRI Disclosure - 2-5, 305-1

IRIS+ - OD4091, OI1479, OI4112, OI5732

SFDR Principal Adverse Impacts - Carbon footprint, GHG Emissions, Greenhouse gas emissions

TCFD - Metrics & Targets b), Metrics & Targets c)

UNGC Questionnaire - E6

UNPRI - PGS 45

WEF Metrics - Greenhouse gas (GHG) emissions

Data View

QUESTION LEVEL INPUT	COMPANY ANSWER
Reliable and auditable data for company's direct GHG emissions (Scope 1)	Applicable
Total direct GHG emissions (2019) (met. ton. CO2e)	1,102,371.000
Total direct GHG emissions (2020) (met. ton. CO2e)	1,088,534.000
Total direct GHG emissions (2021) (met. ton. CO2e)	1,106,674.000
Total direct GHG emissions (2022) (met. ton. CO2e)	1,127,129.000
Direct GHG emissions (Scope 1) target for last fiscal year reported (met. ton. CO2e)	1,069,300.000
Direct GHG emissions (Scope 1): Data Coverage (2019)	100
Direct GHG emissions (Scope 1): Data Coverage (2020)	100
Direct GHG emissions (Scope 1): Data Coverage (2021)	100
Direct GHG emissions (Scope 1): Data Coverage (2022)	100
Public reporting: Direct GHG emissions (Scope 1) data is publicly available	YES
Third party verification: Direct GHG emissions (Scope 1) verified by third party in the most recent fiscal year reported	YES
Data consistency: Direct GHG emissions (Scope 1) data reported in the questionnaire differs from publicly available data	-
Data consistency: Temporary coverage reduction or target challenge in direct GHG emissions (Scope 1) data due to corporate actions	-
Data consistency: Direct GHG emissions (Scope 1) data is not reported in absolute terms and is normalized	-
Combined reporting of Scope 1 & Scope 2 GHG emissions	-

Questionnaire

Please provide your company's total direct greenhouse gas emissions (DGHG SCOPE 1) for the part of your company's operations for which you have a reliable and auditable data acquisition and aggregation system. Please refer to the information button for additional clarifications. For each row in the table, it is mandatory that the values provided are in the same unit. Also, please ensure that you have correctly filled in the Company Information section at the beginning of the questionnaire, and that the coverage in the table below is related to the denominator relevant for your company as indicated in that section.

1. (●)

Direct GHG (Scope 1)	Unit	FY 2019	FY 2020	FY 2021	FY 2022	What was your target for FY 2022?
Total direct GHG emissions (Scope 1)	metric tonnes CO2 equivalents	1102371	1088534	1106674	1127129	1069300
Data coverage (as % of denominator)	percentage of:	100	100	100	100	

PUBLIC REPORTING

1. ☑ Our data is publicly available. Please provide supporting evidence or web link.

THIRD-PARTY VERIFICATION

1. ☑ Our data has been third-party verified in the most recent financial year reported. Please provide supporting evidence.

DATA CONSISTENCY

1. ☐ We report publicly on this information, but the data in the table above differs from our publicly reported figures. Please provide an explanation in the comment box for this difference:
2. ☐ We have a temporary coverage reduction or target challenge due to corporate actions. Please briefly explain if a merger, acquisition, divestment, etc. has temporarily caused a reduction in your ability to report optimal coverage or caused your target to appear abnormal:
3. ☐ We are not able to report this information in absolute terms, the information provided in the table above is normalized data. For the purpose of this question, please always provide absolute figures if available.
4. ☐ We only report combined on Scope 1 & Scope 2 emissions. Please provide the combined figures in the table above and mark "Not applicable" in the next question (EP - Indirect Greenhouse Gas Emissions (Scope 2)).

2. ○ We do not track direct greenhouse gas emissions (Scope 1)
3. ○ Not applicable. Please provide explanations in the comment box below.
4. ○ Not known

Confidential additional comments

Use the text field below only in the following cases: (i) to describe significant changes in data or calculation methodology compared to last year's submission, (ii) to explain why a question is not applicable to your company's business model, (iii) to explain if your data deviates from the unit or format requested, or (iv) to provide supporting notes on translations of non-English references.
