Materiality Analysis

Question

Does the company disclose details of its materiality determination process and how the materiality analysis is conducted?

Rationale

The purpose of this question is to assess the extent to which companies are disclosing the details related to their materiality process. We are looking for the following evidence in the public domain:

1. Frequency of conducting or reviewing materiality analysis

2. Involvement of external stakeholders in identifying the material issues

3. Prioritization of material issues in a materiality matrix or any other form

4. Integration of materiality assessment in the company's enterprise risk management

5. Assessment conducted is based on the principle of double materiality

6. Materiality assessment process is verified by a third-party assurance provider

7. Materiality assessment results are signed off by either board of directors or senior management

Performance Summary	
Question Level Company Performance	50
Question Weight	20
Year-on-Year Change	(50)
Industry Average Score	31
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Materiality: Any factor that can have a present or future impact on value creation and therefore the financial performance of the company over time. These could be economic, environmental, or social in nature.

Double Materiality: According to the principle of Double Materiality, a sustainability issue is seen as material if it presents a significant impact on society or the environment and a significant impact on a company's value drivers, competitive position, and long-term shareholder value creation. Material sustainability issues can significantly affect an entity's business operations, cash flows, legal or regulatory liabilities, and access to capital. They can also significantly improve or undermine an entity's reputation and relationships with key stakeholders, society, and the environment.

Materiality Assessment: A materiality assessment is an approach to identify critical economic, environmental, and social issues which have a significant impact on the company's business performance.

Materiality Assessment Frequency: We expect companies to conduct/ review materiality assessment and to report the results in at least one of the two most recent Annual or Sustainability reports.

Data Requirements

Copy of or link to the Company website, annual report, sustainability report, or other public communication

1. Materiality analysis conducted/reviewed:

Our expectations

- Public disclosure on the frequency of materiality analysis conducted or reviewed. The information should be available in at least one of the two most recent Annual or Sustainability reports

Not acceptable:

- Reference to previous public reports for materiality analysis which are more than 2 years old

2. Involvement of external stakeholders:

Our expectations:

- Whether external stakeholders are involved in the materiality analysis process should be clearly available in the company's public documents/website.

- Information should be available in the section where materiality analysis has been discussed

Not acceptable:

- Only stating that stakeholders are involved without any reference to the type i.e. external or internal stakeholders
- General stakeholder engagement information without any reference to how it is integrated with the materiality assessment process is not acceptable

3. Prioritization of material issues:

Our expectations:

- Material issues should be publicly disclosed and prioritized either in a matrix format or any other format which clearly depicts the prioritization of the issues

Not acceptable:

- Disclosure of material issues without any clear indication of prioritization

4. Integration of materiality assessment results in enterprise risk management (ERM):

Our expectations:

- Public disclosure on the integration of materiality assessment results within the overall risk management process
- Description of how identified material issues are linked with the company's significant risks

Not acceptable:

- General disclosure on ESG-related risks without specifying the linkage with materiality assessment results
- ERM results used as inputs to materiality process

5. Assessment conducted is based on the principle of double materiality:

Our expectations:

- Indication of the principle of double materiality in company public reports/website
- A materiality matrix depicting the impact of material issues on society, the environment, and people

Not acceptable:

- General disclosure on impact valuation analysis without reference to its link with identified material issues

6. Materiality assessment process verified by third-party assurance provider:

Our expectations:

- Public disclosure on assurance report clearly specifying audit of materiality assessment covered in its scope
- A statement specifying external assurance of the materiality assessment process

Not acceptable:

- Disclosure of the involvement of an external consultant in the materiality assessment process
- Assurance statement without a clear indication of materiality assessment under its scope

7. Materiality assessment metrics signed off by the Board of directors or Senior Management:

Our expectations:

Review, sign-off, approved, and oversight of materiality assessment process by:

- the board of directors, a sub-committee of the board of directors, or a single named director OR
- an executive manager/ executive committee
- The materiality assessment results are signed by the respective board/ executive representative(s)/
- A general statement specifying sign-off/approval of materiality assessment result is also sufficient

Not acceptable:

- Executive manager/sustainability manager involvement in the materiality assessment process

Disclosure Requirements

- The document(s) you attached will be used to verify your response.
- The supporting documents need to be available in the public domain.
- Any response that cannot be verified in the attached public document(s) or web link will not be accepted.
