**Question:** Sustainability Reporting Assurance
**Include Modeled Scores :** Yes

**Sustainability Reporting Assurance**

## Question

Does the company have external assurance for its sustainability reporting?

## Rationale

As with financial data, assurance of environmental and social data ensures that it is more reliable and increases the likelihood that investors will use these data in their analysis and investment decisions. Transparency about the assurance process and the data assured also increases stakeholders' trust in published information.

The purpose of this question is to assess the extent to which companies are disclosing the details related to their environmental and social assurance.

### Additional Question Guidance & Information Display

#### Key Definitions

**Assurance specialists:** Include accountants, certification bodies, and specialist consultancies. It does not include an independent advisory board, stakeholder panel, or high-level individual (e.g. Environmental Minister).

**The declaration of independence:** An explicit statement of independence from the auditor confirming that there is no other commercial link to the company's operations or business that could result in a conflict of interest.

**Recognized international or national standard:** refers to assurance standards and not reporting standards (such as GRI guidelines). Examples of these assurance standards are AA1000AS and ISAE 3000, but regional or local standards are also acceptable if they are clearly specified and are comparable to international standards.

Examples include:

- Standard DR03422 (Australia /New Zealand)
- Assurance Engagements of Sustainability Reports (Germany)
- Environmental Report Assurance Services Guidelines by the JICPA (Japan)
- FAR auditing standard RevR6 (Sweden)
- Standard 3810 Assurance Engagements related to Sustainability Reports (the Netherlands)
- AT-C Section 105 and 210 (United States/ Canada)

**Scope of assurance:** If the scope of assurance covers some (but not all) environmental indicators, these need to be clearly marked in the relevant sections of the report. If the assurance statement covers all data items in the report, this also needs to be explicitly stated.

**Conclusion/Level of assurance:** This refers to the conclusion of the assurance process which is according to the level of assurance i.e. *limited/moderate or reasonable assurance*. The level of assurance indicates the extent and depth of the work the assurance provider undertakes in relation to sustainability disclosures. Most assurance providers offer two levels: 'reasonable' assurance (i.e. high but still involving some risk of inappropriate conclusion) or 'limited' assurance (i.e. moderate) (GRI, 2013).

**Supporting evidence:**

This question requires supporting evidence from the public domain. The information provided has to be included in your public reporting (e.g. annual report, sustainability report, integrated report, company publications, separate fuel efficiency strategy document) or corporate website.

Any response that cannot be verified in the attached public document(s) will not be accepted.

**Please Note:** In addition to the keyword search, look for assurance statement in the Index/Content page of the CSR/Annual Report along with the last few pages of the reports for any scanned assurance statements. Such scanned pages do not get highlighted in the keyword search.
