Current Capacity Summary is updated daily and includes all currently owned operating, out of service, under construction, and planned capacity. The aggregation is based off of unit level primary fuel and generation type categorizations and can be summarized by Ultimate Parent or Owner.

Plant Operations and Financials include all plants owned or ultimately owned by the listed company, in the selected report year, where data is available. Only power plants that report net generation, sourced from the EIA 906/923, FERC Form 1 or EPA, are included in the operations section. The financials section includes power plants with reported net generation and financials, sourced from the FERC Form 1, RUS 12, RUS 7, EIA 412 (pre-2004) and S&P Global Market Intelligence estimates. The aggregations are performed based on power plant primary fuel, generation type categorization and ownership percentage.
