Financial Opportunities Arising from Climate Change

Question

Has the company identified any climate change-related opportunities (current or future) that have the potential to generate a substantive positive change in its business operations, revenue, expenditure (i.e., opportunities driven by changes in regulation, physical, or other climate change-related developments)?

Rationale

When a company faces risks associated with climate change (reported in previous question) it is possible that they may also experience opportunities. Both arise from changes in the operating environment for a company and as some changes can represent additional costs, others (or even the same changes)represent opportunities to exploit new markets or products. This question aims to find out if companies have identified climate change related opportunities that have the potential to generate positive change in their business operations, revenue generation and expenditure.

Performance Summary	
Question Level Company Performance	20
Question Weight	11
Year-on-Year Change	0
Industry Average Score	34
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Climate Change Opportunities: can include, but are not limited to:

- Currently being experienced or expected to arise in the future
- Being managed or newly identified
- Well understood or with high levels of uncertainty with regard to the likelihood of the opportunity materializing and the extent to which it will impact the business

Opportunities can be related to any of the following categories:

Regulation: on climate change related issues may present opportunities for your organization if it is better suited than its competitors to meet those regulations, or more able to help others to do so. Possible scenarios would include a company whose products already meet anticipated standards designed to curb emissions, those whose products will enable its customers to meet mandatory requirements or those companies who provide services assisting others in meeting regulatory requirements. Regulation may also create new markets such as emission trading markets leading to new opportunities.

Physical changes: related to climate change may present opportunities in a variety of ways. Reduced sea ice may allow access to new areas for vessels. Changing temperature and rainfall may extend growing seasons for farmers. Alternatively your organization may have goods and services that enable others to adapt to physical changes.

Other climate-related opportunities: include those posed by changes in consumer attitude or improved standing due to your organization's stance or action on climate change.

The **financial implications:** of the opportunity should be expressed quantitatively. It is acknowledged that these will be estimates and where possible the assumptions made in arriving at a financial impact figure should be stated in the comment box.

The **costs associated:** with developing the opportunities refer to the cost arising from the actions needed to exploit the opportunity and maximize its potential realization. Where there is no cost for action, please explicitly state this in the comment box, and in this case insert "0" to the text box provided.

Timeframe: – the timeframe refers to the time when you expect the opportunities to materialize. It is acknowledged that opportunities further into the future are likely to have a higher degree of uncertainty associated with them.

For companies submitting to CDP: in this question we ask you to indicate the estimated timeframe in years, using an **integer**. In CDP questionnaire the time frame is defined as time ranges: Current; 1-5 years; 6-10 years; >10; to convert these ranges to an integrer please use the following conversion table:

- Current = 0
- 1-5 years = 3
- 6-10 years = 8
- >10 = 10

Data Requirements

Please describe and provide figures concerning the most significant opportunity identified.

References

This question refers to **CDP question 2.4a** and **TCFD** recommendation **Strategy (b)**.

GRI Standard 201 -2 is relevant for this question.

The questions in this criterion have been developed in alignment with the CDP (https://www.cdp.net).

Questionnaire

Have you identified any climate change-related opportunities (current or future) that have the potential to generate a substantive positive change in your business operations, revenue, expenditure (i.e. opportunities driven by changes in regulation, physical, or other climate change-related developments)?

1. ○
   Yes, we have identified climate change-related opportunities. Please briefly describe the most significant opportunity resulting from climate change on your business operations, revenue growth, or expenditures:

   Currency:

   1. ☐
      Please estimate the annual financial positive implications of this opportunity:

      Estimated time frame (in number of years) for positive financial implications of this opportunity:

   2. ☐
      Please estimate the current annual costs associated with developing this opportunity:
2. ○
   We do not consider climate change related opportunities (current or future) to be relevant to our business, please explain why:
3. ○
   We have not conducted an analysis of our climate change opportunities.
4. ○
   Not applicable. Please provide explanations in the comment box below.
5. ○
   Not known
