Question: Environmental Management Systems Verification
Include Modeled Scores : Yes

Environmental Management Systems Verification

Question

Does the company publicly report on whether its Environmental Management System (EMS) is certified, audited, or verified?

Rationale

A verified/ audited EMS reflects a company's internal and external commitment towards the monitoring of environmental data. Further, the verification process can facilitate improvements to a company's EMS, improving efficiency and coverage. Our question on audit verification focuses on identifying whether the company has implemented, verified and certified its environmental management system so as to ensure the credibility of the procedures and systems in place.

Performance Summary	
Question Level Company Performance	58
Question Weight	36
Year-on-Year Change	7
Industry Average Score	33
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Data Requirements

Please note that the total coverage for all three alternatives should not exceed 100 % - to avoid double-counting, for the parts of your operations with multiple certifications/types of verification, only mark one of the three options: indicating the coverage of international standards first, followed by third-party verification and then internal verification.

Coverage should be relative to global operations and not only a single subsidiary, region or site.

Please also note that verification only pertains to your Environmental Management Systems, not the verification of environmental data or reporting.
