Question: Environmental Violations
Include Modeled Scores : Yes

Environmental Violations

Question

Does the company publicly report on paid significant fines or penalties related to the environment or ecology for the last four years?

Rationale

Companies are increasingly facing constraints related to natural resources globally and to the eco-services provided by the regions in which they operate. A strong environmental policy and management system (EMS) is needed to ensure the company improves its environmental performance, reducing raw material consumption and preventing degradation of the environment through waste and accidents. With this question we assess the effectiveness of a company's EMS by evaluating the rate of several types of negative incidents over time and their impact on business operations.

Performance Summary	
Question Level Company Performance	100
Question Weight	29
Year-on-Year Change	0
Industry Average Score	46
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Significant Violation - $10,000 USD threshold: If the fines are individually equal to or less than $10,000 USD, the violations should not be reported in the table. The number of violations should only be reported here if the individual fine was over $10,000 USD (or equivalent in converted currency).

Violation: A violation occurs when an authorized body (e.g., governmental body, independent commercial or non-commercial regulator, etc.) determines that a law, regulation, code, etc. related to environmental or ecological issues has been breached.

This definition is essentially in line with the **GRI G4 Sustainability Reporting Guidelines definition of environmental laws and regulations:**

Refers to regulations related to all types of environmental issues (that is, emissions, effluents, and waste, as well as material use, energy, water, and biodiversity) applicable to the organization. This includes binding voluntary agreements that are made with regulatory authorities and developed as a substitute for implementing a new regulation. Voluntary agreements can be applicable if the organization directly joins the agreement or if public agencies make the agreement applicable to organizations in their territory through legislation or regulation.

Number of Violations: The number of violations should be based on specific codes/regulations, at the most granular level, not rolled up into larger cases (e.g., if a company receives one report from the EPA with 100 individual violations, the incident should be reported as 100 violations, not just one).

Date of Violation: The date of the violation should be the actual date the incident occurred, not the date responsibility was determined.

Ongoing legal proceedings/allegations:

- If one of the above organizations has already determined the company is responsible, the incident is considered a violation and should be reported (e.g., the civil or criminal case is to determine damages, penalties or type of responsibility).
- Once an initial judgment has been entered, the incident is considered a violation, regardless of the company's ability to appeal.
- If the company appeals and is absolved of all responsibility for the incident, the violation count and fines/penalties reported can be restated in the next DJSI questionnaire.

If the company appeals and the fines/penalties are reduced, that figure can be restated in the next DJSI questionnaire, but the violation(s) should remain if the fine remains above 10,000 USD (or equivalent in converted currency).

Fines/Penalties: Fines/penalties per year should be those related to the violations that occurred that year. In other words, if a violation occurred in 2011, but the fine was levied in 2012 and paid in 2013, both the violation and the fine should be included only in the 2011 column. Similarly, if an incident occurred in 1990 and the penalty was finalized and paid in 2014, the penalty does not need to be reported.

Environmental liability accrued at year-end: Fines or penalties not paid yet, including expected fines for cases that are not yet closed.In other words, it can be viewed as ongoing "tally" of outstanding expected fines or penalties, and includes violations that occurred in other years.

Data Requirements

Disclosure requirements for partially public question. Additional credit will be granted for relevant publicly available evidence covering the following aspect of this question:

- Fines or penalties related to the environmental or ecological issues for at least the most recent reported year.

Questionnaire

Has your company paid significant fines or penalties related to the environment or ecology in the past four fiscal years?

By "significant" fines or penalties, we mean the fine/penalty individually costs more than $10,000 USD (or equivalent when converted from local currency). Amounts individually equal to or less than $10,000 do not have to be reported. This should also include fines paid as part of settlements related to environmental or ecological issues. Please see the information button for other important definitions.

1. ○
   Yes, our company has paid significant fines or penalties related to the environment or ecological issues in the last four fiscal years. Please indicate the corresponding figures in the table below for each of the four years and attach supporting evidence or weblink if these figures are **publicly reported**. Please note that if you did not have any violations, fines or accrued liability in an individual year, 0 should be indicated in the corresponding box in the table.

	FY 2016	FY 2017	FY 2018	FY 2019
Number of violations of legal obligations/regulations				
Amount of fines/penalties related to the above.				
Currency:				
Environmental liability accrued at year end.				
Currency:				

2. ○
   No, we have not paid any significant fines (> USD $10,000) related to environmental or ecological issues in the past four fiscal years.
3. ○
   Not applicable. Please provide explanations in the comment box below.
4. ○
   Not known

Additional comments

Use the text field below only in the following cases: (i) to describe significant changes in data or calculation methodology compared to last year's submission, (ii) to explain why a question is not applicable to your company's business model, (iii) to explain if your data deviates from the unit or format requested, or (iv) to provide supporting notes on translations of non-English references.
