Year: Methodology Year: 2020
Question: Certifications of Agricultural Crops
Include Modeled Scores : Yes

Certifications of Agricultural Crops

Question

Does the company track its exposure to agricultural crops including the amount used and whether they received certification from one or more independent third parties in the last financial year?

Rationale

Agriculture is a major driver of global environmental impacts. The industrialized production of agricultural commodities puts high pressure on ecosystem and requires substantial resources. The awareness of environmental issues associated with food production (such as GHG emission, biodiversity loss and deforestation) is increasing. In light of rising consumer demands for more transparency and natural products, the global production volume of certified agricultural commodities has increased in recent years.

While it isn't the only solution to a complex problem, voluntary certification does provide a systematic approach to measure and document progress on pre-defined sustainability indicators. Robust, independent sustainability certifications allow stakeholders to monitor and compare companies' positioning on agricultural production.

Performance Summary	
Question Level Company Performance	9
Question Weight	13
Year-on-Year Change	3
Industry Average Score	15
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Agricultural raw materials: Agricultural commodities produced or sourced by the company for the purpose of creating food or feed.

Critical Agricultural Raw Materials: Selected agricultural commodities in this question which have been selected based on their sensitivity to social and environmental risks which include - but are not limited to - climate change, biodegradation, deforestation, health and safety, human, labor & community rights.

Third-Party Certification: In this question refers to the certificate that was issued by an independent organization based on the company's compliance with pre-defined social and environment standards related to sustainable production of a particular agricultural commodity.

Examples of leading third-party certification standards are:

- Roundtable on Sustainable Palm Oil (RSPO)
- Roundtable on Responsible Soy (RTRS)
- BonSucro
- Rainforest Alliance incl. UTZ
- Fair Trade

Data Requirements

Companies in the Food & Drug Retailing Industry that **only do drug retailing** should mark this question as "Not Applicable" and provide an explanation in the comment box.

For **RSPO certification**, please provide details regarding the respective sub-standard in the description: segregated/preserved models or book & claim/mass balance.

For **RTRS certification**, please provide details regarding the respective sub-standard in the description: Production Standard / EU-Red Compliant / Chain of Custody Segregated or Chain of Custody Mass Balance

For **BonSucro**, please provide details regarding the respective sub-standard in the description: Production Standard or Chain of Custody.

For companies which produce or source multiple cereal crops: please provide the combined certified volume if possible and a specification in the comment box.

If your company has developed company-specific raw material standards, in order to receive credit, please provide sufficient supporting evidence regarding the equivalence of the scheme(s).

Questionnaire

Are your company's agricultural raw materials certified to one or more third-party standards or do you demand or monitor such certificates from your suppliers?

1. ○ Yes. Please indicate the independent certification standard and the coverage.

   If you are an **agricultural producer**, please indicate the percentage of total annual production volume covered.

   If you produce **packaged foods & meats**, please indicate the percentage of annual procurement spent on the particular commodity covered.

   If you are in **food & staples retailing**, please indicate the percentage of annual procurement spent on the particular commodity covered for your *private label* product range:

Agricultural commodity	Description of the third-party certifications (if "Not applicable" is ticked, please provide an explanation in the company comment section)	% of annual production volume / procurement that is certified according to a third-party certification (leave blank if "Not applicable" is ticked in the first column)
Palm oil	1. ○ Certification standard and source: [ ] 2. ○ Not applicable	[ ]
Soy	1. ○ Certification standard and source: [ ] 2. ○ Not applicable	[ ]
