Year: Methodology Year: 2020
Question: Product Innovations
Include Modeled Scores : Yes

Product Innovations

Question

Please provide your revenues generated from product innovations in the last FY, which can be allocated to the following product types. Please refer to the information button for our definitions of 'newly commercialized products or services' and 'significantly improved products and services'.

Rationale

With this question we assess new products/new services intensity, a measure of product innovations within a company.

Performance Summary	
Question Level Company Performance	13
Question Weight	35
Year-on-Year Change	(7)
Industry Average Score	36
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Newly commercialized products or services: They include goods and services which are new to the company and have technically new features or are majorly improved (quality, functionality, new packaging etc.). It excludes changes that are more of the same, for example the purchase of further copies of IT equipment of a model already installed somewhere in the firm.

Significantly improved products or services: They include goods and services which are NOT new to the company BUT provide new features or have significantly improved quality, functionality, new packaging etc. for already existing products developed by your company.

Differential in gross margin: A company's total sales revenue for a product minus its cost of goods sold, divided by the total sales revenue, expressed as a percentage is the Gross Margin.

The "Differential in gross margin" calculation is the ratio between the gross margin of new products and the gross margin of the unchanged products as calculated above.

Data Requirements

Please note that if you are a bottling company in the beverage industry, this question should be marked as 'Not Applicable' and an explanation should be provided in the Comment Box at the bottom of the question.
