Emerging Risks

Question

Does the company report on long-term, emerging risks?

Rationale

It is important for investors to understand the long-term risks that companies face and companies' awareness of the impacts of these risks on their business and any mitigating actions that they may be taking in response to such risks - beyond the ongoing operational risks reported by most companies. In disclosing these risks to investors, companies show their ability to plan effectively for long-term risks. Reporting on long-term risks, their impacts on their business and the mitigating actions they are taking can improve investors' confidence in management's ability to plan effectively for long-term challenges and therefore may make the company a more attractive long-term investment.

Performance Summary

Question Level Company Performance	0
Question Weight	12
Year-on-Year Change	0
Industry Average Score	3
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Emerging risks: The focus should lie on the most significant emerging risks that are expected to have a long term impact on the company and that are explained in public disclosures. Risks that are considered to be acceptable here include any newly identified risks that are expected to have a long-term impact on the company's business or on the industry, although in some cases they may have already begun impacting the company's business today. In this question, we are not looking for ongoing operational, reputational, legal or regulatory risks.

Impact on the business: It is not expected that a precise financial impact of these risks on the business can already be calculated or estimated, but rather a convincing description of how these emerging risks could impact the business, and therefore its financial results, over time.

Longer-term emerging risks: The focus of the question is on longer-term emerging risks, i.e. those unlikely to have a significant impact on the company for at least three to five years, but potentially may have begun to have consequences for the company today.

In addition, because the disclosure of long-term emerging risks (beyond operational risks commonly reported by companies or required by regulators) is so important for long-term investors, the risks provided in this question should correspond to risks that are **disclosed publicly** (either in the annual report or in the company's sustainability reporting). Even if the description in the questionnaire differs from, or is more detailed than what is publicly reported, the best answers will be confirmed by evidence that these risks are also disclosed in reporting to investors.

Data Requirements

This question requires supporting evidence from the public domain. The information provided has to be included in your public reporting (e.g. annual report, sustainability report, integrated report, company publications..) or corporate website.

Companies reporting emerging risks in their main financial publications (such as their annual reports or 10K, 20F, etc. filings), as well as the business impacts of these risks and the mitigation measures will be credited more than companies reporting risks solely in their sustainability or non-financial reporting.

Risks and their impact on the company's business should be specific. For example, long-term risks like macroeconomic developments should be described in the context of the business environment that the company operates in (i.e. the specific regulations or laws that may be introduced) and the impact on the company should be specific (i.e. not simply the description of the overall impact on the industry).

Data View

QUESTION LEVEL INPUT	COMPANY ANSWER
Company publicly reports on most impactful long-term emerging risks & mitigating actions	Not known - not measured
Description of emerging risk 1: Reasonable and publicly available	Not known - not measured
Potential business impact of the emerging risk 1: Reasonable and publicly available	Not known - not measured
Mitigating actions of emerging risk 1: Reasonable and publicly available	Not known - not measured
Description of emerging risk 2: Reasonable and publicly available	Not known - not measured
Potential business impact of the emerging risk 2: Reasonable and publicly available	Not known - not measured
Mitigating actions of emerging risk 2: Reasonable and publicly available	Not known - not measured

Questionnaire

Please indicate two important long-term (3-5 years+) emerging risks that your company identifies as having the most significant impact on the business in the future, and indicate any mitigating actions that your company has taken in light of these risks. For each risk, please provide supporting evidence from your **public reporting or corporate website** where the risk, the business impact and any mitigating actions are described.

1. ○

	Description of risk, as reported in the public domain:	**Potential business impact of the risk, as described in the public domain:**	**Mitigating actions, as described in the public domain:**	**Supporting evidence from the public domain on risk, business impact and mitigating actions**
Emerging Risk 1	Not known - not measur	Not known - not measur	Not known - not measur	
Emerging Risk 2	Not known - not measur	Not known - not measur	Not known - not measur	

2. ○ We do not report on long-term, emerging risks.
3. ○ Not applicable. Please provide explanations in the comment box below.
4. ○ Not known
