Critical Supplier Identification

Question

Does your company identify critical suppliers?

Rationale

Companies not only outsource production, services and business processes but responsibilities, risks and opportunities as well. On one hand, outsourcing generally tends to increase a company's flexibility, but on the other hand, supply chain risks might become less apparent, new dependencies may arise, and the identification, monitoring and management of risks and opportunities in the supply chain may become more difficult.

An important first step in supply chain management is to try to understand supply chain risks and dependencies from a general, economic point of view. Once a company has identified its critical suppliers, it can focus its supply chain monitoring and risk management efforts on those suppliers with the potential to cause problems. Therefore, this question seeks to understand to what extent companies are able to identify their critical suppliers.

Performance Summary	
Question Level Company Performance	70
Question Weight	15
Year-on-Year Change	5
Industry Average Score	24
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Critical suppliers: These are defined as suppliers whose goods, materials, services (including intellectual property (IP) / patents) have a significant impact on the competitive advantage, market success or survival of the company. Critical suppliers include high-volume suppliers, suppliers of critical components and non-substitutable suppliers.

Critical non-tier 1 suppliers: This refers to suppliers that are considered critical (see definition above), and provide their products and services to the supplier at the next level in the chain (tier-2 suppliers and higher)

Tier 1 suppliers: This refers to suppliers that directly supply goods, materials or services (including intellectual property (IP) / patents) to the company.

Tier 2 and lower: They provide their products and services to the supplier at the next level in the chain (E.g. Tier-2 supplies to Tier-1)

Data Requirements

Companies in RTS Retailing industry are to report on **all suppliers**, not solely its private label/own brands' suppliers. They should report in terms of percentage (%) of **total suppliers**.
