Question: ESG Integration in SCM Strategy
Include Modeled Scores : Yes

ESG Integration in SCM Strategy

Question

Please indicate the main priorities of your company's general supply chain management strategy as well as the environmental, social and governance (ESG) objectives that have been identified in your company. Further, please indicate how ESG factors are integrated in your supplier selection decisions.

Rationale

Companies not only outsource production, services and business processes but responsibilities, risks and opportunities as well. On one hand, outsourcing generally tends to increase a company's flexibility, but on the other hand, supply chain risks might become less apparent, new dependencies may arise, and the identification, monitoring and management of risks and opportunities in the supply chain may become more difficult.

The ability to systematically integrate sustainability objectives into the overall supply chain strategy shows a strategic dedication to making the supply chain more sustainable which will give the company a better position when it comes to leveraging opportunities and mitigating risks arising in the supply chain. This question aims to assess the extent to which sustainability is integrated into the supply chain strategy and how this is implemented into the business activities such as supplier selection.

Performance Summary

Question Level Company Performance	20
Question Weight	16
Year-on-Year Change	20
Industry Average Score	20
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

In the first section, we refer to the **General Supply Chain Management Strategy**, which does not refer to specific sustainability or ESG aspects but rather to the overall strategy and directives that guide sourcing and buyer decisions. In the second section, we request information on ESG objectives and how they connect to the overall strategy, and here you can refer to sustainability aspects of the general strategy if such objectives exist or to a separate sustainable sourcing strategy or similar. Our main aim is to see whether there might be conflicting requirements; for example, a general strategy focused on price and short lead times, and a sustainable sourcing policy that seeks to minimize air transport.

Percentage weight allocated to ESG factors in supplier selection: This refers to a practice in which sustainability or ESG criteria are considered an integral part of supplier selection, together with other factors such as price, quality and delivery time. It should be clear that such criteria are consistently applied across the product group for which this is indicated.

Tier 1 suppliers: This refers to suppliers that directly supply goods or services to the company

Questionnaire

Please indicate the main priorities of your company's general supply chain management strategy as well as the environmental, social and governance (ESG) objectives that have been identified in your company. Further, please indicate how ESG factors are integrated in your supplier selection decisions.

1. ○

General supply chain strategy

Please provide a brief description of the top five priorities of your company's general supply chain management strategy and attach supporting evidence. Please note that this should refer to the general approach that the company is taking in order to manage the supply chain with regards to aspects such as cost, time, quality and continuity of supply and not to a sustainable sourcing or a sustainable supply chain strategy.

Integration of ESG objectives

Please indicate which formalized environmental, social and governance (ESG) objectives have been identified for your supply chain management strategy. Further, indicate how these are connected to the overall supply chain strategy by providing supporting documents. Please note that in this section you can refer to a sustainable sourcing strategy or a sustainable supply chain strategy as well as to objectives relating to ESG factors already integrated in the strategy above.

	Description of ESG objective	Link to overall supply chain strategy
Key ESG Objective 1		
Key ESG Objective 2		

Integration of ESG factors into supplier selection

Please complete the table below, indicating how ESG factors impact your supplier selection and retention process. Please attach supporting documents and provide a brief description on the scale and approach for the minimum threshold for either new suppliers, existing suppliers or both.

Please indicate if the threshold is for new suppliers, existing suppliers or both:	Minimum quantitative/qualitative threshold required (i.e. certified management systems in place, requiring to replicate own standards down the supply chain, minimum score at ESG assessment, etc.):
Please select	

Does your company use a % (weight) of ESG in the overall assessment of suppliers (compared to other factors such as price, quality and delivery time), as a tool to ensure integration of sustainability into supplier selection and retention decisions? If so, please provide an estimate of the average weight across supplier categories:

and indicate for which supplier categories this weight factor is being applied:

2. ○

We do not have such a strategy in place.

3. ○
