Supplier Code of Conduct

Question

Does the company have a supplier code of conduct and is it available publicly?

Rationale

Companies not only outsource production, services and business processes but responsibilities, risks and opportunities as well. On one hand, outsourcing generally tends to increase a company's flexibility, but on the other hand, supply chain risks might become less apparent, new dependencies may arise, and the identification, monitoring and management of risks and opportunities in the supply chain may become more difficult.

A general supplier code of conduct summarizes and represents the basic commitments a company requires from its suppliers. It also serves as a first information source for prospective suppliers. With this question, we assess if your company has a supplier code of conduct, if it is public, and what issues it covers.
