Question: Return on Employee Development Investment
Include Modeled Scores : Yes

Return on Employee Development Investment

Question

Does your company have a metric to quantitatively measure the benefits from its investments linked to a specific employee development program?By investments in a specific employee development program, we mean expenses related to education, training, incentive programs, etc. This does not include base salary or standard benefits (e.g. vacation, insurance, etc.)By return on investments linked to a specific employee development program, we mean the increase in profits, savings or changes in other metrics such as employee engagement, employee retention, absenteeism per monetary unit spent (e.g. USD 1 million) associated with an employee development program. The metric used in 3.4.3 Human Capital Return on Investment is not accepted here.

Rationale

While it is now common knowledge that investments in employee development and training provide valuable benefits in terms of productivity, quality and employee retention and satisfaction, companies are now faced with decisions about where to invest their valuable training and development budgets. This question examines how companies measure the benefits of their investments in employee development, providing more granular insight into the benefits achieved through investments in training, education and incentive programs in order for companies to see if their investments are generating reasonable benefits over time.

Data Requirements

Please explain how your company is able to determine the quantitative benefits achieved by your investments in employee development programs.

Investment in Employee Development Programs: Include expenses related to education, training, incentive programs, etc. This does not include salary or benefits.

Quantitative benefits: These benefits are either monetary benefits such as increases in sales, increases in profits or profitability, World Class Manufacturing (WCM) savings, etc. directly related to the programs, or changes in other metrics such as employee engagement, employee retention, absenteeism, which can be monitored directly or converted into monetary values. Both types of quantitative benefits need to be attributable to the program specifically. For example: if your company invested in a leadership program for high potential individuals, did you see an increase in employee retention for that same group of employees?

Questionnaire

Does your company have a metric to quantitatively measure the benefits from its investments linked to a specific employee development program?

By **investments in a specific employee development program**, we mean expenses related to education, training, incentive programs, etc. This does not include base salary or standard benefits (e.g. vacation, insurance, etc.)

By **return on investments linked to a specific employee development program**, we mean the increase in profits, savings or changes in other metrics such as employee engagement, employee retention, absenteeism per monetary unit spent (e.g. USD 1 million) associated with an employee development program.

The metric used in 3.4.3 Human Capital Return on Investment is not accepted here.

1. ○ Yes, we have a metric for calculating our return on program-specific employee development investments. Please select the approach that best describes your measurement of this return on investment and provide supporting evidence. **Please describe the specific metric used, including the specific training costs associated with the corresponding return measurement.**
   1. ○ We use a third-party methodology (e.g., the Kirkpatrick Model, Level 3 Behavior or Level 4 Results) to identify the value of training to our business and resulting ROI linked to a specific employee development program. Please specify the return metric used as a result of applying this methodology:

      Metric

      Please provide the value of the metric used to measure the return on investments linked to a specific employee development program:

FY 2016	FY 2017	FY 2018	FY 2019

   2. ○ We can estimate the improvements in employee turnover or employee engagement per **monetary unit spent (e.g. USD 1 million)** linked to a specific training and employee development program. Please specify:

      Metric

      Please provide the value of the metric used to measure the return on investments linked to a specific employee development program:

FY 2016	FY 2017	FY 2018	FY 2019

   3. ○ We can estimate the cost savings **per monetary unit spent (e.g. USD 1 million)** linked to a specific training program (e.g. World Class Manufacturing, Six Sigma, Health & Safety Program). Please specify:

      Metric

      Please provide the value of the metric used to measure the return on investments linked to a specific employee development program:

FY 2016	FY 2017	FY 2018	FY 2019

   4. ○ We can estimate the increase in sales or the changes in our company's profitability **per monetary unit spent (e.g. USD 1 million)** linked to a specific training and employee development program (such as sales training). Please specify:

      Metric

      Please provide the value of the metric used to measure the return on investments linked to a specific employee development program:

FY 2016	FY 2017	FY 2018	FY 2019

2. ○ No, we do not have or are currently developing such a human capital return metric.
3. ○ Not applicable. Please provide explanations in the comment box below.
4. ○ Not known
