Training & Development Inputs

Question

Please fill out the following table for the related training & development data for the last fiscal year and attach supporting evidence of where this information is reported.

Rationale

For many industries, Human capital development is one of the most financially material sustainability factors. The quality of employees that companies are able to attract and retain differentiates those that are well-positioned to succeed in their respective industries from those that are not, so strong human capital development practices are considered an important source of competitive advantage.

This question assesses whether companies track their inputs in employee development.

Performance Summary	
Question Level Company Performance	100
Question Weight	25
Year-on-Year Change	50
Industry Average Score	33
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

FTEs (Full-Time Equivalents), is the number of working hours that represents one full-time employee during a fixed time period, such as one month or one year. The concept is used to convert the hours worked by several part-time employees into the hours worked by full-time employees.

Average hours of training and development per FTE refers to the total number of hours of training and development provided in the last fiscal year divided by the total number of FTEs.

Average amount spent on training and development per FTE refers to the total amount spent on training and development in the last fiscal year divided by the total number of FTEs.

Percentage of open positions filled by internal candidates refers to the total number of open positions filled by a company's own employees divided by the total number of vacancies in the company in the last fiscal year. This metric provides a means of determining the effectiveness of human capital development by providing employees with the skills required for promotion, and it also demonstrates how proactive organizations are in providing their employees with new challenges for growth and development throughout their careers.

References

GRI Standard 404-1 is relevant for this question.
