Year: Methodology Year: 2020
Question: Occupational Illness Frequency Rate (OIFR) - Employees
Include Modeled Scores : Yes

Occupational Illness Frequency Rate (OIFR) - Employees

Question

Please provide your company's occupational illness frequency rate for employees (per one million hours worked). It is mandatory that the values provided are in the same unit. If your company's OIFR for employees is equal to zero for one or more fiscal years, this data will only be accepted if evidence of third-party verification is provided.

Rationale

Poor occupational health and safety (OHS) performance has a direct negative impact on labor costs through lower productivity. Lower performance not only poses a threat to company's reputation and staff morale, but also results in increased operating costs in the form of fines and other contingent liabilities. We expect companies to keep track of the occupational illnesses or diseases suffered by its employees and prevent those illnesses or diseases from further aggravation.

Performance Summary

Question Level Company Performance	48
Question Weight	30
Year-on-Year Change	0
Industry Average Score	20
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Occupational Illness or Diseases Frequency Rate (OIFR): The number of occupational illness or diseases cases for the reporting year per million hours worked, calculated using the following equation:

(Number of events in the accounting period) / (Total hours worked in accounting period) x 1'000'000

Data Requirements

Please only provide the OIFR in the specified format. If you use a different unit of measurement that can be converted to OIFR, please do so and explain this in the comment box.

Disclosure requirements for partially public question. Additional credit will be granted for relevant publicly available evidence covering the following aspect of this question:

- Employee Occupational Illness Frequency Rate (OIFR) for at least the most recent reported year.

Data consistency

• If the occupational health & safety performance data reported in the questionnaire do not correspond to the publicly reported figures, the corresponding option should be marked and the discrepancy should be explained. This option should not be indicated if the information is not publicly reported at all.

References

GRI Standard 403-10 is relevant for this question.
