Trend of Employee Wellbeing

Question

Does the company track the results of its employee survey?

Rationale

Internal employee engagement surveys are a crucial tool for developing policies to attract, retain and develop the best employees. It is essential that companies collect and measure feedback from employees, who are valuable assets of the company as well as significant stakeholders in it. In this question we determine whether companies conduct regular engagement surveys of their employees and analyze the results of these surveys. Opinions about the company, the work-place and overall feedback can be very different depending on the employee responding. Differences can also be found between different employee groups or between men and women. The question also aims to assess whether companies are able to break down the results of their internal engagement surveys by gender, allowing them to understand differences of opinion and address potential issues.

Performance Summary	
Question Level Company Performance	80
Question Weight	25
Year-on-Year Change	27
Industry Average Score	18
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Engagement: definitions of employee engagement may vary, but the following are representative:

- **Gallup:** Those who are involved in, enthusiastic about, and committed to their work and workplace.
- **Utrecht Work Engagement Scale (UWES-9):** "A positive, fulfilling, work-related state of mind that is characterized by vigor, dedication, and absorption."
- **Grovo:** "A deep, personal, and empowered investment in work." Deep because the employee cares about the quality of their work. Personal because the work and its contribution to the success of company matters to the employee. And empowered because "the employee is capable of delivering a quality that will reward their investment of time, talents, effort, and care."

Our Methodology for measuring Employee Engagement

% of actively engaged employees is the percentage of employees who reported that they feel "actively engaged" or simply "engaged" as opposed to "not engaged", "passive", or "actively disengaged" out of the total number of employees who participated in the survey. **Source: SASB**

Actively engaged: The classification should generally reflect the use of 4, 5, 7 or 10 point scales, where "actively engaged" is 3-4 on a 4 point scale, 4-5 on a 5 point scale, 5-7 on a 7 point scale, and 7-10 on a 10 point scale, or the equivalent **. Sources: The Vitality Institute and Aon Hewitt.**

Determining who is actively engaged: Engagement is generally determined through a composite score derived from several questions, however it may also be determined with a single question about "overall" engagement. Whatever the case, the result should be provided in a scale that corresponds to the above definitions of "actively engaged".

Examples of scoring systems

5 point scale, where 4-5 are considered "actively engaged":

1. Not engaged
2. Somewhat disengaged
3. Passive
4. Somewhat engaged
5. Highly engaged

Aon Hewitt uses the following four categories, where 3-4 are considered "actively engaged":

1. Actively disengaged
2. Passive
3. Moderately engaged
4. Highly engaged

Examples of Engagement Evaluation Aspects (5 point scale: Strongly Agree, Agree, Neutral, Disagree, Strongly Disagree):

- I understand the strategy and goals of the company
- I understand how my work contributes to the company achieving these goals
- I am proud to work for the company
- I am excited and inspired to come to work most days
- I have the feedback I need to succeed in my role.

% of total employees refers to the percentage of employees who participated in the employee engagement survey out of the total number of employees

Target: Targets can be the precise, stated target for the year in which the survey was conducted, or if the target is long-term for a specific future year, it can be linearly extrapolated. For instance, if the company reported 70% of employees were actively engaged in FY2015, and set a two-year target of reaching 80% by FY2017, the linearly extrapolated target for FY2016 would be 75% (e.g. 10% improvement divided by two years equals 5% per year).

Other methodologies for measuring employee engagement

Companies may provide employee satisfaction instead of employee engagement, another measure if their scale for engagement cannot be translated into the method described above, or any other similar metric.

Unit: to be described by the company in the text box provided

% of total employees refers to the percentage of employees who participated in the employee engagement survey out of the total number of employees

Data Requirements

If your company only conducts an Employee Engagement survey every two years, please duplicate the value of the previous year in the table and provide the target for the most recent year a survey was conducted.

Data View

No information was found in the public domain.

Questionnaire

Please indicate in the following table the percentage of actively engaged employees based on your company's scaled employee engagement surveys. Please also indicate the coverage of these surveys and if this measurement can be broken down according to gender. For each row in the table, it is mandatory that the values provided are in the same unit.

If your company only conducts an Employee Engagement survey every two years, please duplicate the value of the previous year in the table and provide the target for the most recent year a survey was conducted.

1. ○

Standard Method - Please refer to the information button for a description of the methodology.

Employee engagement	Unit	FY 2016	FY 2017	FY 2018	FY 2019	What was your target for FY 2019?
Employee engagement	% of actively engaged employees					
Data coverage	% of total employees					

PUBLIC REPORTING

1. ☐

The results of our employee engagement surveys are publicly available. Please provide supporting evidence or web link.

GENDER BREAKDOWN

1. ☐

We are able to break down the results of our employee engagement surveys based on gender. Please attach supporting evidence.

SURVEY METHODOLOGY

Please provide a definition of the company's approach to measuring employee engagement:

Please provide the scale or options used in the survey (e.g. 5 point scale; "actively engaged", "disengaged", "strongly agree", "agree", "don't know", "disagree", "strongly agree".)

2. ○

Alternative Method - We use another method to measure employee engagement or satisfaction. Please specify the method and attach supporting evidence.

Please describe the method:	Please describe the unit used:	FY 2016	FY 2017	FY 2018	FY 2019	What was your target for FY 2019?
Data coverage	% of total employees					

PUBLIC REPORTING

1. ☐

The results of our surveys are publicly available. Please provide supporting evidence or web link.

GENDER BREAKDOWN

1. ☐

We are able break down the results our employee engagement surveys based on gender. Please attach supporting evidence.

3. ○

We do not track employee engagement or satisfaction.

4. ○

Not applicable. Please provide explanations in the comment box below.

5. ○
