Biodiversity Commitment

Question

Does the company have a commitment on biodiversity and is it available publicly?

Rationale

The purpose of this question is to evaluate if your company has a publicly available commitment for your company's own operations and supply chain, and if your company manages this risk by setting targets to offset any losses (no net loss) or aims to achieve a net positive impact on biodiversity. Companies are expected to prohibit operations, whether own operations or that of suppliers, in World Heritage areas or IUCN Category I-IV protected areas. If your company is operating in areas in close proximity to critical biodiversity, it is expected to apply mitigation hierarchy (avoid, minimize, restore & offset) and that your company engages with external partners to fulfill your commitment.

Performance Summary	
Question Level Company Performance	25
Question Weight	35
Year-on-Year Change	0
Industry Average Score	4
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Operational Activities: Includes production, extraction, plantation, or development activities

Areas: Refers to land or any other natural environment which is used, owned, leased, operated, or permitted by the company

Biodiversity: For the purpose of this question, we use a very broad definition of biodiversity. This can include species (flora and fauna), ecosystems, and/or habitats

Sites containing globally or nationally important biodiversity: Globally important biodiversity can include:

- Species classified as Critically Endangered, Endangered, or Vulnerable on the IUCN Red List, endemic species
- Internationally recognized areas: World Heritage sites, Ramsar Wetlands, UNESCO MAB
- Important biodiversity areas: Important Bird Areas, key biodiversity areas, AZE sites, Endemic Bird Areas, important plant areas

Nationally important biodiversity can include legally protected areas, habitats, and species.

Companies are expected to have a position or commitment on biodiversity and the impact of their operations, even if they do not currently operate in World Heritage Sites or IUCN Category I-IV protected areas.

Mitigation hierarchy: A sequential approach to protect and enhance biodiversity: Avoid, minimize, rehabilitate/restore, offset. Offsetting is a last resort to mitigate the remaining residual impact.(https://www.forest-trends.org/bbop/bbop-key-concepts/mitigation-hierarchy/)

External Partners: This could include conservation NGOs or experts in biodiversity assessment and management. Partners must be related to biodiversity management and not general sustainability or environmental management. If your company works with multiple partners, please provide the main organizations.

Target: It must be related to No Net Loss (NNL) or overall improvement in the biodiversity value of the land under company responsibility. These can include net positive impact (NPI), biodiversity gains, positive change for biodiversity, etc. Commitments related to processes such as related to conducting assessments or implementing rehabilitation plans, implementing biodiversity action plans at sensitive sites, education/training, or philanthropy will not be accepted.

No Net Loss: It is defined as the point at which project-related impacts on biodiversity are balanced by measures taken to avoid and minimize the project's impacts, to undertake on-site restoration, and finally to offset significant residual impacts, if any, on an appropriate geographic scale (e.g., local, landscape-level, national, regional). (IFC performance standard 6)

Industry-Specific Guidance

Utilities (ELC, GAS, MUW)

- Utilities that have no power generation or transmission business or are only in electricity/gas distribution should mark "Not Applicable"
- MUW industry: Pure water utilities should mark "Not Applicable"

Real Estate (REA)

- "Not Applicable" is acceptable if supporting information confirms that your company only operates in urban areas and/or have nothing to do with construction

Food & Drug Retailing (FDR)

- Companies in the Food & Drug Retailing Industry that only do drug retailing, should mark this question as "Not Applicable" and provide an explanation in the comment box.
- Companies in the Food & Drug Retailing Industry that only operate in urban areas, should mark this question as "Not Applicable" and provide an explanation in the comment box.
- Companies that do not have private label (or own brand) products in retailing or distribution, should mark this question as "Not Applicable" and provide an explanation in the comment box.

Data View

QUESTION LEVEL INPUT	COMPANY ANSWER
The company has a publicly available commitment to maintain, enhance, or conserve biodiversity/ecosystems on the land under its responsibility	Applicable
Commitment not to operate/explore/mine/drill in World Heritage areas and IUCN category I-IV protected areas	-
Biodiversity commitment includes the application of mitigation hierarchy when operating in areas with globally or nationally important biodiversity	-
Biodiversity commitment includes working with external partners to help the company fulfill this commitment	YES
Company uses metrics to measure its biodiversity impact	YES
Name(s) of main partners and information of the type of engagement to fulfill biodiversity commitment	organization that accompanies us for the fulfillment of our commitments and policies related to the sustainable supply of our key ingredients related to biodiversity. We also have exercises to assess our impact on biodiversity in Mexico within the AMEBIN alliance (Mexican Alliance for Biodiversity and Business)
Description of target for no net loss or net improvement	Acres with Regenerative Agriculture practices
Biodiversity commitment includes a target for net positive impact	-
Biodiversity commitment includes a target for no net loss or net improvement	-
Biodiversity commitment includes other target than net loss or net positive impact	YES
Company has a target year for full implementation of the biodiversity commitment	YES
Target year for full implementation of biodiversity commitment (Calendar Year)	2050
Quantitative progress on the implementation of biodiversity commitment	-
Percentage of quantitative progress on the implementation of biodiversity commitment	Not answered
The scope of the biodiversity commitment includes own operations	-
The scope of the biodiversity commitment includes tier-1 suppliers	-
The scope of the biodiversity commitment includes non tier-1 suppliers	-

Questionnaire

Does your company have a publicly available commitment to maintain, enhance, or conserve biodiversity/ecosystems for your company's own operational activities (e.g. production, extraction, plantation, or development activities), and is this commitment applicable to your company's supply chain?

1. (●)

Yes, we have a biodiversity commitment and includes the following elements:

1. ☐ Commitment required of own operations and supply chain to avoid operational activities in close proximity to World Heritage areas and IUCN Category I-IV protected areas
2. ☐ Application of mitigation hierarchy (avoid, minimize, restore & offset) when operating in areas in close proximity to critical biodiversity
3. ☑ Work with external partners to fulfill the commitment. Please provide name(s) of main partners and information of the type of engagement:

organization that accom

Target

Please provide details of your group-wide and time-bound biodiversity target, as well as the progress made towards this target in the recent financial year:

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

1. ☑

   Please describe the metrics used to measure your impact on biodiversity, and indicate the extent of your commitment to biodiversity:

   Acres with Regenerativ

   1. ☐ Commitment to net positive impact (NPI)
   2. ☐ Commitment to no net loss (NNL)
   3. ☑ Other commitment. Please describe:

   2. ☑ Target year for full implementation of your biodiversity commitment:

   2050

   3. ☐ Quantitative progress (in percent) towards the full implementation of your commitment in the recent financial year:

   Not answered

Scope of commitment

Please indicate the scope of your commitment:

1. ☐ Requirement of own operations
2. ☐ Requirement of tier-1 suppliers
3. ☐ Requirement of non tier-1 suppliers

2. ○ No, we don't have a commitment to biodiversity
3. ○ Not applicable. Please provide explanations in the comment box below
4. ○ Not known
