Question: Trend of Employee Wellbeing
Include Modeled Scores : Yes

Trend of Employee Wellbeing

Question

Does the company track the results of its employee survey?

Rationale

Internal employee engagement surveys are a crucial tool for evaluating employee experience and developing policies to attract, retain and develop the best employees and identify areas for improvement. In this question we determine whether companies conduct regular engagement surveys of their employees and analyze the results of these surveys. Opinions about the company, the workplace and overall employee experience can be very different depending on the individual employee and the different employee groups they belong to. For this reason, this question also aims to assess whether companies break down the results of their internal engagement surveys by age group, gender, race or ethnicity, management level etc. allowing them to understand differences of opinion and address potential issues.

Performance Summary	
Question Level Company Performance	85
Question Weight	25
Year-on-Year Change	5
Industry Average Score	16
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Engagement: definitions of employee engagement may vary, but the following are representative:

- **Gallup:** Those who are involved in, enthusiastic about, and committed to their work and workplace.
- **Utrecht Work Engagement Scale (UWES-9):** "A positive, fulfilling, work-related state of mind that is characterized by vigor, dedication, and absorption."
- **Grovo:** "A deep, personal, and empowered investment in work." Deep because the employee cares about the quality of their work. Personal because the work and its contribution to the success of company matters to the employee. And empowered because "the employee is capable of delivering a quality that will reward their investment of time, talents, effort, and care."

Methodology for measuring Employee Engagement. Our Methodology

% of actively engaged employees is the percentage of employees who reported that they feel "actively engaged" or simply "engaged" as opposed to "not engaged", "passive", or "actively disengaged" out of the total number of employees who participated in the survey.

Actively engaged: the classification should generally reflect the use of 4, 5, 7 or 10 point scales, where "actively engaged" is 3-4 on a 4 point scale, 4-5 on a 5 point scale, 5-7 on a 7 point scale, and 7-10 on a 10 point scale, or equivalent. Engagement is generally determined through a composite score derived from several questions; however, it may also be determined with a single question about "overall" engagement. Whatever the case, the result should be provided in a scale that corresponds to the above definitions of "actively engaged".

Examples of scoring systems

5 point scale, where 4-5 are considered "actively engaged":

1. Not engaged
2. Somewhat disengaged
3. Passive
4. Somewhat engaged
5. Highly engaged

Examples of Engagement Evaluation Aspects (5 point scale: Strongly Agree, Agree, Neutral, Disagree, Strongly Disagree):

- I understand the strategy and goals of the company
- I understand how my work contributes to the company achieving these goals
- I am proud to work for the company
- I am excited and inspired to come to work most days
- I have the feedback I need to succeed in my role.

% of total employees refers to the percentage of employees who participated in the employee engagement survey out of the total number of employees in the latest reporting year.

Target: Targets can be the precise, stated target for the year in which the survey was conducted, or if the target is long-term for a specific future year, it can be linearly extrapolated. For instance, if the company reported 70% of employees were actively engaged in FY2015, and set a two-year target of reaching 80% by FY2017, the linearly extrapolated target for FY2016 would be 75% (e.g. 10% improvement divided by two years equals 5% per year).

Alternative Method: Companies may provide employee satisfaction instead of employee engagement, another measure if their scale for engagement cannot be translated into the method described above, or any other similar metric.

Unit: Please specify in this field what is the unit in the survey your company is using e.g. % of satisfied employees to be described by the company in the text box provided.

Data Requirements

- Companies with fewer than 100 employees (e.g. investment offices and vehicles, funds, holding companies, etc.) should mark this question Not Applicable
- If your company only conducts an Employee Engagement survey every two years, please duplicate the value of the previous year in the table and provide the target for the most recent year a survey was conducted.

Data breakdown

- We don't expect companies to break down the employee engagement results by all the categories mentioned in the question, but full points for this section will be granted for having a breakdown by at least two categories.
- In Europe, according to the **Article 9 of the GDPR**, it is prohibited to process personal data revealing racial or ethnic origin, except if the data subject has given explicit consent to the processing of those personal data, provided this is not prohibited by national law. Other exemptions exist, such as reasons of substantial public interest which might include statistical research purposes for equality of opportunity and treatment. We therefore expect companies to report on **only two different categories,** in order to not penalize companies that do not report data breakdown on race.
- For this section, companies can attach either private or public evidence and we expect to see the specific data broken down by these categories e.g. " x% of women are engaged, y% of men are engaged and z% of other gender group are engaged". That means that companies are expected to provide quantitative figures and not simple evidence that for example the employee's gender was asked in the employee engagement survey.

Data View

QUESTION LEVEL INPUT	COMPANY ANSWER
Percentage of actively engaged employees based on company's scaled employee engagement surveys	We use the standard method

Percentage of total employees covered through employee engagement survey (2020)	80
Results of surveys are publicly available	-
Results of employee engagement survey has a breakdown by age	-
Results of employee engagement survey has a breakdown by gender	-
Results of employee engagement survey has a breakdown by management level	-
Results of employee engagement survey has a breakdown by race, ethnicity, nationality, country of origin or cultural background	YES
Definition of company's approach to measuring employee engagement	For the engagement survey we work with a partner. This is Mercer, the world's preeminent talent consulting and analytics firms, combined with over 40 years of global thought leadership in organizational assessment and attitude research from Sirota. They provide us experience and comparatives benchmarks and norms. also they lead in data analytics linking survey results to critical business outcomes; matching what associates say to what they actually do (&Gas/Do&?) The survey is based on 16 different dimensions, including engagement dimension.is a 76 multiple choice questionnaire with 2 extra open ended questions. All Grupo Bimbo associates, from front line to top executives are invited to respond the survey. Participation is voluntary. The survey is active for 3 weeks. The survey is conducted every 2 years.

Questionnaire

Please indicate in the following table the percentage of actively engaged employees based on your company's scaled employee engagement surveys. Please also indicate the coverage of these surveys and if this measurement can be broken down according to any of categories they are indicated below.

If your company only conducts an Employee Engagement survey every two years, please duplicate the value of the previous year in the table and provide the target for the most recent year a survey was conducted.

1. ◉

Standard Method - Please refer to the information button for a description of the methodology.

Employee engagement	Unit	FY 2017	FY 2018	FY 2019	FY 2020	What was your target for FY 2020?
Employee engagement	% of actively engaged employees	0	90	90	90	90
Data coverage	% of total employees	0	80	80	80	

PUBLIC REPORTING

1. ☐ The results of our employee engagement surveys are publicly available. Please provide supporting evidence or web link.

DATA BREAKDOWN

We break down the results of our employee engagement surveys based on the following categories. Please provide supporting evidence:

1. ☐ Age group
2. ☐ Gender
3. ☐ Management level (e.g. junior/low level, middle, senior/top level management)
4. ☑ Race, ethnicity, nationality, country of origin or cultural background

SURVEY METHODOLOGY

Please provide a definition of the company's approach to measuring employee engagement:

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

For the engagement sur

Please provide the scale or options used in the survey (e.g. 5 point scale; "actively engaged", "disengaged"; "strongly agree", "agree", "don't know", "disagree", "strongly agree".)

2. ○

Alternative Method - We use another method to measure employee engagement or satisfaction. Please specify the method and attach supporting evidence.

Please describe the method:	Please describe the unit used:	FY 2017	FY 2018	FY 2019	FY 2020	What was your target for FY 2020?
Not answered	Not answered	Not answered	Not answered	Not answered	Not answered	Not answered
Data coverage	% of total employees	0	80	80	80	

PUBLIC REPORTING

1. ☐ The results of our surveys are publicly available. Please provide supporting evidence or web link.

DATA BREAKDOWN

We break down the results of our employee engagement surveys based on the following categories. Please provide supporting evidence:

1. ☐ Age group
2. ☐ Gender
3. ☐ Management level (e.g. junior/low level, middle, senior/top level management)
4. ☑ Race, ethnicity, nationality, country of origin or cultural background

3. ○ We do not track employee engagement or satisfaction.
