Question: Type of Performance Appraisal
Include Modeled Scores : Yes

Type of Performance Appraisal

Question

Does the company conduct individual and/or team-based performance appraisals?

Rationale

In this question, we assess the various tools that companies use to measure individuals' performance and to what extent these tools are applied throughout the organization.

Performance Summary	
Question Level Company Performance	100
Question Weight	20
Year-on-Year Change	0
Industry Average Score	26
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Please note that multiple options might be valid for some employees, so the sum of all options doesn't need to add up to 100%.

Management by objectives: Refers to a process in which employees have pre-defined and measurable goals that are set on at least a yearly basis together with their line manager and systematically followed up on.

Multidimensional performance appraisal: Refers to a system in which the employee's performance is formally evaluated not just by their direct line manager, but also by their peers, direct reports, and other employees, providing what is referred to as a "360 degree" view of the employee's performance.

A formal comparative ranking: Refers to a system in which employees are systematically graded relative to their peers in the same group (for example within the team performing a particular function).

Data Requirements

- Companies with fewer than 100 employees (e.g. investment offices and vehicles, funds, holding companies, etc.) should mark this question Not Applicable.

Supporting evidence:
No document is required to support your response. You may still provide a reference using the reference clip. This could include examples of the underlying calculations or approaches to data aggregation used to compile the provided quantitative information.

References

GRI Standard 404-3 is relevant for this question.

Data View
