BMV:BIMBO A (MI KEY: 4276592; SPCIQ KEY: 877906; TCUID: 53231)

Public

Year: Methodology Year: 2022
Question: Net-Zero Commitment
Include Modeled Scores : Yes

Net-Zero Commitment

Question

Has the company committed to reaching net-zero emissions across its value chain and is it available publicly?

Rationale

Companies are increasingly adopting net-zero targets in order to align their activities with the aim of limiting global temperature rise to 1.5°C above pre-industrial levels. Due to the lack of common understanding of the definition of net-zero, the Science Based Targets initiative (SBTi) has developed a global science-based standard for companies to set net-zero targets.

The purpose of this question is to find out if a company has made a net-zero commitment, how well it is aligned with the science-based targets and what activities are planned to reach the target. This question follows the criteria and definitions of the SBTi Net-Zero Standard.

Performance Summary	
Question Level Company Performance	100
Question Weight	11
Year-on-Year Change	0
Industry Average Score	10
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Net-zero commitment: A credible corporate net-zero commitment includes commitments to:

- Reducing scope 1, 2, and 3 emissions to zero or to a level that is consistent with reaching net-zero emissions at the global or sector level in eligible 1.5°C-aligned pathways.
- Neutralizing any remaining emissions that could not be reduced at the net-zero target year and any GHG emissions released into the atmosphere thereafter.

Science-based targets: "Targets are considered 'science-based' if they are in line with what the latest climate science deems necessary to meet the goals of the Paris Agreement – limiting global warming to well-below 2°C above pre-industrial levels and pursuing efforts to limit warming to 1.5°C." Source: SBTi

Science Based Targets initiative (SBTi): A global body that defines and promotes best practice in emissions reductions and net-zero targets in line with climate science. It provides technical assistance, expert resources to companies who set science-based targets, and independent assessment and validation of those targets.

The SBTi process for target setting and validation is as follows: • Committing to a Science Based Target via a letter of intent • Developing a target in line with SBTi criteria • Presenting target to SBTi for official validation (within 2 years of committing) • Communicating this validation to stakeholders • Reporting progress against these targets annually

Base Year: Companies should use the same base year for near-term targets and long-term net-zero targets.

Target Year: To limit global warming to 1.5°C above pre-industrial levels we must reach net-zero GHG emission by 2050. Hence, companies are expected to set their own net-zero targets by 2050 or sooner.

Residual emissions: Emissions sources that remain after a company has included all technically or economically feasible emission reductions to their target.

Beyond value chain mitigation: Mitigation action or investments that fall outside a company's value chain. This includes activities outside of a company's value chain that avoid or reduce greenhouse gas emissions, such as carbon credits or other "offsetting", or measures that remove greenhouse gases from the atmosphere and permanently store them.

Data requirements

This question requires public evidence. As public evidence, we can accept the company's own website and reporting, public CDP reports, or information disclosed in the Science Based Targets initiative's website: https://sciencebasedtargets.org/companies-taking-action.

Please note that we will not accept targets without Target Year specified.

This question should only be answered if a near-term emission reduction target is reported in the previous question.

Standards & frameworks

CDP Climate - C4.1a, C4.2a, C4.2c

UNGC Questionnaire - E1, E1.1

WEF Metrics - Paris-aligned GHG emissions targets, TCFD implementation

Data View

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

QUESTION LEVEL INPUT	COMPANY ANSWER
Company's public commitment to reach net-zero emissions	Applicable
Base Year for publicly reported net-zero target	2019
Target Year for publicly reported net-zero target	2050
Scope (Coverage) of net-zero target for Scope 1 & 2 emissions	100
Scope (Coverage) of net-zero target for Scope 3 emissions	100
Is the target validated by Science-Based Targets initiative?	Yes
Programs or activities to achieve the emission reduction targets defined or implemented	YES
Programs or activities to achieve the emission reduction targets defined or implemented covers Scope 1 & 2 emissions	YES
Programs or activities to achieve the emission reduction targets defined or implemented covers Scope 3 emissions	YES
Company intend to neutralize residual emissions and/or further mitigate emissions beyond its value chain	-
Company neutralize residual emissions and/or further mitigate emissions beyond its value chain through Offsetting, e.g. purchasing carbon credits	Not answered
Company neutralize residual emissions and/or further mitigate emissions beyond its value chain through Investing in permanent carbon removal	Not answered

Questionnaire

Has your company publicly committed to reaching net-zero GHG emissions and set targets and programs to fulfil the commitment? *Please note that this question should only be answered if a near-term absolute or relative emission reduction target is reported in the previous question Climate-Related Target.*

1. (●)

   Yes, we have publicly committed to reaching net-zero emissions across our value chain. Please provide details of a long-term emission reduction target linked to your net-zero commitment and indicate where this is available in your public reporting.

Target Time Frame	Target scope & related emission reduction target	Is the target validated by Science-Based Targets initiative?
Base Year: 2019 Target Year: 2050	Scope 1 & 2: 100 Scope 3: 100	1. (●) Yes 2. ( ) No, but we have publicly committed to seek validation to the target by SBTi 3. ( ) No, but we consider the target to be science-based 4. ( ) No, the target is not science-based

   Net-zero Strategy:

   1. [x] We have defined or already implemented programs or activities to achieve the emission reduction targets.
      1. [x] Scope 1 & 2
      1. [x] Scope 3
   2. [ ] We intend to neutralize residual emissions and/or further mitigate emissions beyond our value chain with the following activities:
      1. [ ] Offsetting, e.g., purchasing carbon credits
      1. [ ] Investing in permanent carbon removal

2. ( ) No, we don't have a public net-zero commitment.
3. ( )
