Question: Waste Disposal
Include Modeled Scores : Yes

Waste Disposal

Question

Does the company track its total solid waste recycled/reused and disposed?

Rationale

Producing more with less material is essential for many industries affected by the growing scarcity of natural resources. Operational Eco-Efficiency enhances competitiveness in terms of cost reductions and reduces environmental liabilities. It also enables companies to be better prepared for future environmental regulations. The key focus is on inputs and outputs of business operations and the assessment of trends in the consumption of natural resources and the production of environmental waste products specific to each industry.

Performance Summary	
Question Level Company Performance	96
Question Weight	21
Year-on-Year Change	29
Industry Average Score	29
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Total waste recycled/reused: This includes the part of the waste generated as a result of a company's operations (e.g., during extraction and processing of raw materials, manufacturing, consumption of final products or any other human activity), which has been diverted from disposal through preparation for reuse, recycling, composting or other recovery operations (i.e., processing of waste products, components or materials to be reused in place of new products, components or materials that should otherwise have been used for that purpose). This does **not** include waste incinerated with energy recovery (which is expected to be captured as part of the specific row under total waste disposed), or waste handled by third-parties (e.g., municipal waste management companies) unless it is clear that the waste is being recycled, prepared for reuse or composted by the third-party (see additional clarification in 'Special data requirement for Waste').

Total waste disposed: This is the total of all waste directed to disposal, including waste landfilled, incinerated with energy recovery, incinerated without energy recovery or otherwise disposed (e.g., deep well injection). It also captures waste with 'unknown disposal methods', such as waste handled by municipal waste management companies without any information available on the disposal methods used. For each method of disposal, the value includes both on and off-site disposal.

Data Requirements

Specific data requirement for waste

Waste should be reported in dry metric tons of waste, disaggregated by the amount recycled/ reused and the specific disposal method (waste landfilled, waste incinerated with or without energy recovery, waste otherwise disposed or waste with unknown disposal method), respectively.

- In case the company reports zero total waste disposed, third-party verification or supporting evidence is required (e.g., comprehensive comment, internal documentation or public reporting) to substantiate zero waste disposed
- If you only have information available on the waste disposed by some or no specific disposal methods (waste landfilled, waste incinerated with or without energy recovery, otherwise disposed), please report the total waste disposed and the values for those disposal methods for which you have reliable data. The rows for disposal methods without available data should be left blank. The difference between total waste disposed and the sum of the specific disposal methods will be automatically captured in the row 'waste with unknown disposal method'. Please note that the company will not lose points if no detailed breakdown of the disposal methods used is available

For companies who have the questions '**Hazardous Waste', 'Ash and Gypsum Waste' or 'Mineral Waste'** in their questionnaire, please do not report information on these types of waste here but rather, report relevant data for these types of waste separately in those questions. For example: if a company has the question on 'Waste Disposal' and the question on 'Hazardous Waste' in the questionnaire, non-hazardous waste should be captured in the question on 'Waste Disposal' and hazardous waste in the question on 'Hazardous Waste', respectively. If you do not have those questions in your industry questionnaire, please include all types of waste in this question.

If a company sets long-term but not annual targets, an annual target can be estimated based on internal target setting or a linear distribution. If a company does not have a specific target on waste disposed but specific (internal or public) targets on waste generated and/or recycled, the conversion to a waste disposed target is acceptable.

Waste from extraordinary activities should not be considered. The definition of what is considered to be extraordinary should be consistent with financial reporting. Example: we would not expect a pharmaceutical company building its new headquarters to report the resulting construction waste.

Disclosure requirements for partially public question. Additional credit will be granted for relevant publicly available evidence covering the following aspect of this question:

- Total waste disposed figure (or alternatively, total waste generated **and** recycled figures) for at least the most recent reported year. The specific breakdown of the disposal methods used is not required to be publicly available.

Third-party verification: For third-party verification, we expect that data in the most recent year reported has been third-party verified and that relevant documentation is attached showing this verification. Internal audits or verification will not be considered.

Data consistency

•If the environmental performance data reported in the questionnaire do not correspond to the publicly reported figures, the corresponding option should be marked and the discrepancy should be explained. This option should not be indicated if the information is not publicly reported at all.

•If there is a temporary reduction in coverage due to, for example, a major acquisition, the corresponding box should be marked and the reduction should be explained.

•If it is not possible to report the figures in absolute terms, the data should be reported in relative terms and the corresponding box should be ticked. Please note that information should always be reported in absolute terms if possible, even if it deviates from public reporting.

•If the data reported are not consistent with the definition provided above, the data should be provided in the table, the option should be marked, and an explanation of how it differs should be provided in the comment box.

General data requirements

•Environmental performance data should cover the activities of the entire company with the same consolidation as used in financial reporting and must refer to the financial year (e.g., 01/01 to 31/12 for both financial and environmental data) and be aligned with the figures reported in the Company Information section question.

In particular, environmental data of group companies should follow the following rules

• Environmental data of companies that are consolidated at-equity must not be considered.

• Environmental data of companies that are consolidated proportionally must be considered to the proportion at which they are consolidated financially.

•Environmental data of companies that are fully consolidated must be fully considered irrespective of the proportion to which they belong to the group.

• Environmental data should refer to the specific company structure of each particular year. There should be no pro-forma backward consolidation of the current company structure.

• Environmental data of companies that are sold or no longer consolidated should be excluded from environmental data as of the reporting period in which the company has not been consolidated any more.

• Environmental data of companies that have been bought should only be included as of the reporting period in which the company is consolidated financially for the first time.

• Where environmental data does not cover all consolidated activities of the company, the scope should be indicated together with the environmental data that is known.

• Where the reported environmental data deviates from these definitions you are asked to explain in what way the data provided differs from the definitions.

• Please ensure that the Company Information section has been correctly filled in, and that the coverage in the table below is based on the same denominator.

Total waste incinerated without energy recovery (2020)	Not answered
Total waste incinerated without energy recovery (2021)	Not answered

Questionnaire

Please provide a breakdown of your company's **total solid waste recycled/reused and disposed**, disaggregated by the type of disposal method, for the part of your company's operations for which you have a reliable and auditable data acquisition and aggregation system. If you don't use a specific waste disposal method, please indicate "0". If you only have the breakdown of your waste disposed for some methods, please report these values in the respective rows and leave the other rows blank.

For each row in the table, it is mandatory that the values provided are in the same unit. Please also ensure that you have correctly filled in the "Company Information" section at the beginning of the questionnaire and that the coverage in the table below is related to the denominator relevant for your company as indicated in that section.

If you have the **EP - Hazardous Waste, EP – Ash & Gypsum Waste and/or EP - Mineral Waste questions** in your industry questionnaire, please report information pertaining to these types of waste in those separate questions. If you **do not** have those questions in your industry questionnaire, please include all types of data here (e.g., including hazardous waste).

PUBLIC REPORTING

1. [x]

Our data on total waste disposed and/or waste generated and recycled/ reused (for at least the most recent financial year reported) is publicly available. Please provide supporting evidence or web link.

THIRD-PARTY VERIFICATION

1. [ ]

Our data has been third-party verified in the most recent financial year reported. Please provide supporting evidence.

DATA CONSISTENCY

1. [ ]

We report publicly on this information, but the data in the table above differs from our publicly reported figures. Please provide an explanation in the comment box for this difference:

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

1. ☐

   We have a temporary coverage reduction or target challenge due to corporate actions. Please briefly explain if a merger, acquisition, divestment, etc. has temporarily caused a reduction in your ability to report optimal coverage or caused your target to appear abnormal:

1. ☐

   We are not able to report this information in absolute terms, the information provided in the table above is normalized data. For the purpose of this question, please always provide absolute figures if available.

2. ○

   We do not track solid waste disposed.

3. ○

   Not applicable. Please provide explanations in the comment box below.

4. ○

   Not known

Confidential additional comments

Use the text field below only in the following cases: (i) to describe significant changes in data or calculation methodology compared to last year's submission, (ii) to explain why a question is not applicable to your company's business model, (iii) to explain if your data deviates from the unit or format requested, or (iv) to provide supporting notes on translations of non-English references.
