Climate Governance

Question

Does the company have governance mechanisms in place to oversee climate-related issues?

Rationale

The purpose of this question is to assess whether a company's board of directors and management carry direct responsibility for the oversight and management of climate risks and opportunities. This information helps investors and other stakeholders understand whether climate-related issues receive sufficient attention at the highest levels of governance. This can be indicated by public disclosure of board oversight and management responsibility assigned to certain roles or committees, as well as the frequency of discussions on climate issues.

This question is aligned with TCFD which recommends organizations disclose information on board's oversight of climate-related issues as well management's role in assessing and managing climate-related issues.

Performance Summary	
Question Level Company Performance	80
Question Weight	9
Year-on-Year Change	0
Industry Average Score	32
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Board-level committee with oversight: Assigned committee, formed of board members only, with responsibility for overseeing climate-related issues.

Management position: Highest ranking individual with dedicated management responsibility for assessing and managing climate-related issues.

Management-level committee: A management-level committee responsible for assessing and managing climate-related issues.

Data Requirements

Board Oversight: Board oversight refers to a board-level committee responsible for overseeing climate-related issues. Evidence that the committee oversees climate-related issues should be available in the relevant section in TCFD, CDP or other reports. Please select the correct option from the drop-down list.

If the board committee is different from a climate or sustainability-specific committee, the climate responsibility needs to be clearly described within public reporting.

In order to accept the committee as a board-level committee, all members must be part of the board. If the committee is made up of both board members and management, please record this committee in the 'Management Responsibility' section of the question.

For two-tier boards, the board-level committee must be formed of members of the supervisory board.

Management responsibility: Management responsibility refers to the highest level of management with dedicated responsibility for managing climate-related issues. This can either be an individual or a management-level committee. The individual or committee should not be part of the board of directors. Please select the correct option from the drop-down list.

If you have both a Chief Climate/Sustainability/ESG Officer and a Chief Risk Officer who manage climate-related risks, please select Chief Climate/Sustainability/ESG Officer.

For two-tier boards, management responsibility can be at the management board level.

This question requires supporting evidence from the public domain. The information provided has to be included in your public reporting (e.g. annual report, sustainability report, integrated report, company publications) or corporate website.

Standards & Frameworks

CDP Climate - C1.1a, C1.1b, C1.2
