Water Risks Management of Suppliers

Question

Does the company collaborate with critical tier 1 suppliers located in water-stressed areas to minimize water risks?

Rationale

It is in the best interest of companies that their critical Tier 1 suppliers are aware of and manage water-related risks as an effective risk management measure. With this question, we assess the degree of co-operation between companies and tier 1 suppliers in managing various water-related risks.

Performance Summary	
Question Level Company Performance	70
Question Weight	15
Year-on-Year Change	0
Industry Average Score	20
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Critical suppliers are defined by us as suppliers whose goods, materials, services (including intellectual property (IP) / patents) have a significant impact on the competitive advantage, market success or survival of the company. Critical suppliers include high-volume suppliers, suppliers of critical components and non-substitutable suppliers.

Tier 1 suppliers refer to suppliers that directly supply goods, materials or services (including intellectual property (IP) / patents) to the company.

Data Requirements

Supporting evidence:

- The document(s) you attached will be used to verify your response.
- The supporting documents do not need to be available in the public domain.
- The CDP Water Security report may be used as evidence for this question if it is less than two years old
- If a question text field is available, a comprehensive answer in that field can be accepted instead of a supporting document.
- Any response that cannot be verified in the attached document(s) or via the information provided in the related question text field (if available) will not be accepted.
